<td></td>
<td>(b) If MSE is other than L1 bidder, then the split criteria as per tender condition will be followed subject to price matching with L1 bidder in order of ranking treating the MSE bidder(s) at par with the general bidder. In such event also, order(s) going to MSE bidder(s) could be greater than 25%. If order(s) going to MSE bidder(s) is/are less than 25% after the matching of rates with L1 bidder by adopting the tender split criteria, then the clause of purchase preference for award to MSE bidder(s) up to 25% of the tendered quantity subject to matching L1 rates will be followed to make the total quantity going to MSE bidder(s) @ 25%; provided the rates are within L1+15% range. In such cases, remaining quantity after award of 25% to MSE bidder(s) shall be distributed amongst other eligible bidders in the pre-declared split ratio. If order(s) going to MSE bidder(s) is less than 25% and also MSE bidder(s) not meeting the condition of purchase preference clause</td>
</tr>

(c) If MSE is in the range of L1+15% and not getting the order after splitting and award is going to all non MSE bidder(s), then in such event 25% will be awarded to MSE bidder(s) who fall in the range of L1+15% subject to price matching and remaining 75% will be awarded as per the tender conditions to general bidders subject to matching L1 rates.

(d) If after splitting MSE bidder(s) are getting order for more than or equal to 25%, then other MSE bidder(s) will not be awarded any work under purchase preference clause even if they fall in the range of L1+15%. However, they will be considered for award of work as any other general bidder as per tender conditions subject to matching of rates in order of ranking.

(e) If MSE bidder is a single resultant vendor, then the quantity that would be considered for award to such bidder will be as defined in the pre-declared split ratio to L-1 bidder in the tender condition; provided the quoted rates of the bidder are found reasonable by CESL. However, CESL reserves the right to award 100% quantity to such MSE bidder provided the MSE bidder has got ATO which is corresponding to the cumulative applicability for 100% order value. In case, where ATO of the MSE bidder is less than what is required for 100% cumulative order value, then work may be awarded to MSE bidder(s) who fall in the range of L1+15% subject to price matching and remaining 75% will be awarded as per the tender conditions to general bidders subject to matching L1 rates.

c) Public Procurement policy is meant for procurement of goods produced and services rendered by Micro and Small Enterprises. The preference to MSEs is not applicable for awarded to such MSE bidder in proportion to the ATO. Any such delegation may be revoked at any time. Any such delegation or revocation shall be subject to a prior notice signed by the Implementing Partner’s Representative, and shall specify the powers, functions and authorities thereby delegated or revoked. No such delegation or revocation shall take effect unless and until a copy thereof has been delivered to CESL and the Project Manager.

Any act or exercise by any person of powers, functions and authorities so delegated to him or her in accordance with this GCC Sub-Clause 17.2.3 shall be deemed to be an act or exercise by the Implementing Partner’s Representative.

CESL shall provide evidence of the same, whereupon the Implementing Partner shall remove such person from the Facilities.

Within twenty-eight (28) days after the date of notification of award of Contract, the Implementing Partner shall prepare and submit to the Project Manager a detailed program of performance of the Contract, made in the form of PERT Network and showing the sequence in which it proposes to design, manufacture, transport, assemble, install and pre-commission the Facilities, as well as the date by which the Implementing Partner reasonably requires that the CESL shall have fulfilled its obligations under the Contract so as to enable the Implementing Partner to execute the Contract in accordance with the program and to achieve Completion and Acceptance of the Facilities in accordance with the Contract. The program so submitted by the Implementing Partner shall accord with the Time Schedule included in Appendix 4 (Time Schedule) to the Contract Agreement and any other dates and periods specified in the Contract. The Implementing Partner shall update and revise the program as and when appropriate or when required by the Project Manager, but without modification in the Times for Completion given in the SCC and any extension granted in accordance with GCC Clause 40, and shall submit all such revisions to the Project Manager.

18.4 Progress of Performance
If at any time the Implementing Partner’s actual progress falls behind the program referred to in GCC Sub-Clause 18.2 (Program of Performance), or it becomes apparent that it will so fall behind, the Implementing Partner shall, at the request of CESL or the Project Manager, prepare and submit to the Project Manager a revised program, taking into account the prevailing circumstances, and shall notify the Project Manager of the steps being taken to expedite progress so as to attain Completion of the Facilities within the Time for Completion under GCC Sub-Clause 8.2 (Time for Commencement and Completion), any extension thereof entitled under GCC Sub-Clause 40.1 (Extension of Time for Completion), or any ex-tended period as may otherwise be agreed upon between CESL and the Implementing Partner.

The Implementing Partner may from time to time propose any addition to or deletion from any such list. The Implementing Partner shall submit any such list or any modification thereto to CESL for its approval in sufficient time so as not to impede the progress of work on the Facilities. Such approval by CESL for any of the Sub Implementing Partners shall not relieve the Implementing Partner from any of its obligations, duties or responsibilities under the Contract.

19.2 The Implementing Partner shall select and employ its Sub Implementing Partners for such major items from those listed in the lists referred to in GCC Sub-Clause 19.1.

19.3 For items or parts of the Facilities not specified in Appendix 5 (List of Approved Sub Implementing

The Implementing Partner shall be responsible for any discrepancies, errors or omissions in the specifications, drawings and other technical documents that it has prepared, whether such specifications, drawings and other documents have been approved by the Project Manager or not, provided that such discrepancies, errors or omissions are not because of inaccurate information furnished in writing to the Implementing Partner by or on behalf of CESL.

20.1.2 The Implementing Partner shall be entitled to disclaim responsibility for any design, data, drawing, specification or other document, or any modification thereof provided or designated by or on behalf of the CESL, by giving a notice of such disclaimer to the Project Manager.

20.3.4 If the Project Manager disapproves the document, the Implementing Partner shall modify the
document and resubmit it for the Project Manager’s approval in accordance with GCC Sub-Clause 20.3.2. The procedure for submission of the documents by the Implementing Partner and their approval by the Project Manager shall be discussed and finalised with the Implementing Partner.

20.3.5 If any dispute or difference occurs between CESL and the Implementing Partner in connection with or arising out of the disapproval by the Project Manager of any document and/or any modification(s) thereto that cannot be settled between the parties within a reasonable period, then such dispute or difference may be referred to an Adjudicator for determination in accordance with GCC Sub-Clause 6.1 (Adjudicator) hereof. If such dispute or difference is referred to an Adjudicator, the Project Manager shall give instructions as to whether and if so, how, performance of the Contract is to proceed. The Implementing Partner shall proceed with the Contract in accordance with the Project Manager’s instructions, provided that if the Adjudicator upholds the Implementing Partner’s view on the dispute and if CESL has not given notice under GCC Sub-Clause 6.1.2 hereof, then the Implementing Partner shall be reimbursed by CESL for any additional costs incurred by reason of such instructions and shall be relieved of such responsibility or liability in connection with the dispute and the execution of the instructions as the Adjudicator shall decide, and the Time for Completion shall be extended accordingly.

20.3.6 The Project Manager’s approval, with or without modification of the document furnished by the Implementing Partner, shall not relieve the Implementing Partner of any responsibility or liability imposed upon it by any provisions of the Contract except to the extent that any subsequent failure results from modifications required by the Project Manager.

20.3.7 The Implementing Partner shall not depart from any approved document unless the Implementing Partner has first submitted to the Project Manager an amended document and obtained the Project Manager’s approval thereof, pursuant to the provisions of this GCC Sub-Clause 20.3.

If the Project Manager requests any change in any already approved document and/or in any document based thereon, the provisions of GCC Clause 39 (Change in the Facilities) shall apply to such request.

the resolution of any difference or conflict that may arise between the Implementing Partner and other Implementing Partners and the workers of CESL in regard to their work.

22.4.4 The Implementing Partner shall notify the Project Manager promptly of any defects in the other Implementing Partners’ work that come to its notice, and that could affect the Implementing Partner’s work. The Project Manager shall determine the corrective measures, if any, required to rectify the situation after inspection of the Facilities. Decisions made by the Project Manager shall be binding on the Implementing Partner.

If, by reason of an emergency arising in connection with and during the execution of the Contract, any protective or remedial work is necessary as a matter of urgency to prevent damage to the Facilities, the Implementing Partner shall immediately carry out such work.

If the Implementing Partner is unable or unwilling to do such work immediately, CESL may do or cause such work to be done as CESL may determine is necessary in order to prevent damage to the Facilities. In such event CESL shall, as soon as practicable after the occurrence of any such emergency, notify the Implementing Partner in writing of such emergency, the work done and the reasons therefor. If the work done or caused to be done by CESL is work that the Implementing Partner was liable to do at its own expense under the Contract, the reasonable costs incurred by CESL in connection therewith shall be paid by the Implementing Partner to CESL. not required by the Contract, provided that the Implementing Partner’s reasonable costs and expenses incurred in the carrying out of such test and/or inspection shall be added to the Contract Price. Further, if such test and/or inspection impedes the progress of work on the Facilities and/or the Implementing Partner’s performance of its other obligations under the Contract, due allowance will be made in respect of the Time for Completion and the other obligations so affected.

23.6 If any Plant and Equipment or any part of the Facilities fails to pass any test and/or inspection, the Implementing Partner shall either rectify or replace such Plant and Equipment or part of the Facilities and shall repeat the test and/or inspection upon giving a notice under GCC Sub-Clause 23.3.

23.7 If any dispute or difference of opinion shall arise between the parties in connection with or arising out of the test and/or inspection of the Plant and Equipment or part of the Facilities that cannot be settled between the parties within a reasonable period of time, it may be referred to the Adjudicator for determination in accordance with GCC Sub-Clause 6.1 (Adjudicator).

23.8 The Implementing Partner shall afford CESL and the Project Manager, at CESL’s expense, access at any reasonable time to any place where the Plant and Equipment are being manufactured or the Facilities are being installed, in order to inspect the progress and the manner of manufacture or installation, provided that the Project Manager shall give the Implementing Partner a reasonable prior notice.

23.9 The Implementing Partner agrees that neither the execution of a test and/or inspection of Plant and Equipment or any part of the Facilities, nor the attendance by CESL or the Project Manager, nor the issue of any test certificate pursuant to GCC Sub-Clause 23.4, shall release the Implementing Partner from any other responsibilities under the Contract.

23.10 No part of the Facilities or foundations shall be covered up on the Site without the Implementing Partner carrying out any test and/or inspection required under the Contract. The Implementing Partner shall give a reasonable notice to the Project Manager whenever any such part of the Facilities or foundations are ready or about to be ready for test and/or inspection; such test and/or inspection and notice thereof shall be subject to the requirements of the Contract.

23.11 The Implementing Partner shall uncover any part of the Facilities or foundations, or shall make openings in or through the same as the Project Manager may from time to time require at the Site, and shall reinstate and make good such part or parts.

If any part of the Facilities or foundations have been covered up at the Site after compliance with the requirement of GCC Sub-Clause 23.10 and are found to be executed in accordance with the Contract, the expenses of uncovering, making openings in or through, reinstating, and making good the same shall be borne by CESL, and the Time for Completion shall be reasonably adjusted to the extent that the Implementing Partner has thereby been delayed or impeded in the performance of any of its obligations under the Contract.

24. Completion of the Facilities

24.1 As soon as the Facilities or any part thereof has, in the opinion of the Implementing Partner, been completed operationally and structurally and put in a tight and clean condition as specified in the Technical Specifications, excluding minor items not materially affecting the operation or safety of the Facilities, the Implementing Partner shall so notify CESL in writing.

24.2 Within seven (7) days after receipt of the notice from the Implementing Partner under GCC Sub-Clause 24.1, CESL shall supply the operating and maintenance personnel specified in Appendix 6 (Scope
of Works and Supply by CESL) to the Contract Agreement, required for Pre-commissioning of the Facilities or any part thereof.

Unless otherwise specified in the Technical Specifications, CESL shall also provide, within the said seven (7) day period, the raw materials, utilities, lubricants, chemicals, catalysts, facilities, services and other matters required for Pre-commissioning of the Facilities or any part thereof.

24.3 As soon as reasonably practicable after the operating and maintenance personnel have been supplied by CESL and the raw materials, utilities, lubricants, chemicals, catalysts, facilities, services and other matters, if so specified in Appendix 6 (Scope of Works and Supply by the CESL)/Technical Specifications, have been provided by CESL in accordance with GCC Sub-Clause 24.2, the Implementing Partner shall commence Pre-commissioning of the Facilities or the relevant part thereof in preparation for Commissioning.

24.4 As soon as all works in respect of Pre-commissioning are completed and, in the opinion of the Implementing Partner, the Facilities or any part thereof is ready for Commissioning, the Implementing Partner shall commence Commissioning as per procedures stipulated in Technical Specifications, and as soon as Commissioning is satisfactorily completed, the Implementing Partner shall so notify the Project Manager in writing.

24.5 The Project Manager shall, within fourteen (14) days after receipt of the Implementing Partner’s notice under GCC Sub-Clause 24.4, either issue a Completion Certificate in the form specified in the Forms and Procedures section in the bidding documents, stating that the Facilities or that part thereof have reached Completion as at the date of the Implementing Partner’s notice under GCC Sub-Clause 24.4, or notify the Implementing Partner in writing of any defects and/or deficiencies.

If the Project Manager notifies the Implementing Partner of any defects and/or deficiencies, the Implementing Partner shall then correct such defects and/or deficiencies, and shall repeat the procedure described in GCC Sub-Clause 24.4.

If the Project Manager is satisfied that the Facilities or that part thereof have reached Completion, the Project Manager shall, within seven (7) days after receipt of the Implementing Partner’s repeated notice, issue a Completion Certificate stating that the Facilities or that part thereof have reached Completion as at the date of the Implementing Partner’s repeated notice.

If the Project Manager is not so satisfied, then it shall notify the Implementing Partner in writing of any defects and/or deficiencies within seven (7) days after receipt of the Implementing Partner’s repeated notice, and the above procedure shall be repeated.

24.6 If the Project Manager fails to issue the Completion Certificate and fails to inform the Implementing Partner of any defects and/or deficiencies within fourteen (14) days after receipt of the Implementing Partner’s notice under GCC Sub-Clause 24.4 or within seven (7) days after receipt of the Implementing Partner’s repeated notice under GCC Sub-Clause 24.5, or if CESL makes use of the Facilities or part thereof, then the Facilities or that part thereof shall be deemed to have reached Completion as of the date of the Implementing Partner’s notice or repeated notice, or as of CESL’s use of the Facilities, as the case may be.

24.7 As soon as possible after Completion, the Implementing Partner shall complete all outstanding minor items so that the Facilities are fully in accordance with the requirements of the Contract, failing which CESL will undertake such completion and deduct the costs thereof from any monies owing to the Implementing Partner.

24.8 Upon Completion, CESL shall be responsible for the care and custody of the Facilities or the relevant
part thereof, together with the risk of loss or damage thereto, and shall thereafter take over the Facilities or the relevant part thereof.

25. **Commissioning, Guarantee Test and Operational Acceptance**

25.1 **Commissioning**

25.1.1 Commissioning of the Facilities or any part thereof shall be completed by the Implementing Partner as per procedures detailed in the Technical Specifications.

CESL shall, unless otherwise specified in Appendix 6 (Scope of Works and Supply by the CESL)/Technical Specifications, supply the operating and maintenance personnel and all raw materials, utilities, lubricants, chemicals, catalysts, facilities, services and other matters required for Commissioning of the Facilities.

25.2 **Guarantee Test (where ever applicable)**

25.2.1 The Guarantee Test (and repeats thereof) shall be conducted by the Implementing Partner after Commissioning of the Facilities or the relevant part thereof to ascertain whether the Facilities or the relevant part can attain the Functional Guarantees specified in the Contract Documents. The Implementing Partner’s and Project Manager’s advisory personnel shall attend the Guarantee Test. CESL shall promptly provide the Implementing Partner with such information as the Implementing Partner may reasonably require in relation to the conduct and results of the Guarantee Test (and any repeats thereof).

25.2.2 If for reasons not attributable to the Implementing Partner, the Guarantee Test of the Facilities or the relevant part thereof cannot be successfully completed within the period from the date of Completion specified in the SCC or any other period agreed upon by CESL and the Implementing Partner, the Implementing Partner shall be deemed to have fulfilled its obligations with respect to the Functional Guarantees, and GCC Sub-Clauses 28.2 and 28.3 shall not apply.

25.3 **Operational Acceptance**

25.3.1 Subject to GCC Sub-Clause 25.4 (Partial Acceptance) below, Operational Acceptance shall occur in respect of the Facilities or any part thereof when

(a) the Guarantee Test has been successfully completed and the Functional Guarantees are met; or

(b) the Guarantee Test has not been successfully completed or has not been carried out for reasons not attributable to the Implementing Partner within the period from the date of Completion specified in the SCC or any other period agreed upon period as specified in GCC Sub-Clause 25.2.2 above, but successful Completion of the Facilities has been achieved; or

(C) the Implementing Partner has paid the liquidated damages specified in GCC Sub-Clause 28.3 hereof; and

(d) any minor items mentioned in GCC Sub-Clause 24.7 hereof relevant to the Facilities or that part thereof have been completed.

25.3.2 At any time after any of the events set out in GCC Sub-Clause 25.3.1 have occurred, the Implementing Partner may give a notice to the Project Manager requesting the issue of an Operational Acceptance Certificate in the form provided in the Bidding Documents or in another form acceptable to CESL in respect of the Facilities or the part thereof specified in such notice as at the date of such notice.
25.3.3 The Project Manager shall, after consultation with CESL, and within forty five (45) days after receipt of the Implementing Partner’s notice, issue an Operational Acceptance Certificate.

25.3.4 If within forty five (45) days after receipt of the Implementing Partner’s notice, the Project Manager fails to issue the Operational Acceptance Certificate or fails to inform the Implementing Partner in writing of the justifiable reasons why the Project Manager has not issued the Operational Acceptance Certificate, the Facilities or the relevant part thereof shall be deemed to have been accepted as at the date of the Implementing Partner’s said notice.

25.4 Partial Acceptance

25.4.1 If the Contract specifies that Completion and Commissioning shall be carried out in respect of parts of the Facilities, the provisions relating to Completion and Commissioning including the Guarantee Test shall apply to each such part of the Facilities individually, and the Operational Acceptance Certificate shall be issued accordingly for each such part of the Facilities.

25.4.2 If a part of the Facilities comprises facilities such as buildings, for which no Commissioning or Guarantee Test is required, then the Project Manager shall issue the Operational Acceptance Certificate for such facility when it attains Completion, provided that the Implementing Partner shall thereafter complete any outstanding minor items that are listed in the Operational Acceptance Certificate.

F. Guarantees and Liabilities

26. Completion Time Guarantee

26.1 The Implementing Partner guarantees that it shall attain Completion of the Facilities (or a part for which a separate time for completion is specified in the SCC) within the Time for Completion specified in the SCC pursuant to GCC Sub-Clause 8.2, or within such extended time to which the Implementing Partner shall be entitled under GCC Clause 40 (Extension of Time for Completion) hereof.

26.2 If the Implementing Partner fails to attain Completion of the Facilities or any part thereof within the Time for Completion or any extension thereof under GCC Clause 40 (Extension of Time for Completion), the Implementing Partner shall pay to CESL liquidated damages in the amount computed at the rates specified in the SCC. The aggregate amount of such liquidated damages shall in no event exceed the amount specified as “Maximum” in the SCC. Once the “Maximum” is reached, CESL may consider termination of the Contract, pursuant to GCC Sub-Clause 42.2.2.

Such payment shall completely satisfy the Implementing Partner’s obligation to attain Completion of the Facilities or the relevant part thereof within the Time for Completion or any extension thereof under GCC Clause 40 (Extension of Time for Completion). The Implementing Partner shall have no further liability whatsoever to CESL in respect thereof.

However, the payment of liquidated damages shall not in any way relieve the Implementing Partner from any of its obligations to complete the Facilities or from any other obligations and liabilities of the Implementing Partner under the Contract.

Save for liquidated damages payable under this GCC Sub-Clause 26.2, the failure by the Implementing Partner to attain any milestone or other act, matter or thing by any date specified in Appendix 4 (Time Schedule) to the Contract Agreement and/or other program of work prepared pursuant to GCC Clause 18 (Program of Performance) shall not render the Implementing Partner liable for any loss or damage thereby suffered by CESL.
27. **Defect Liability**

27.1 The Implementing Partner warrants that the Facilities or any part thereof shall be free from defects in the design, engineering, materials and workmanship of the Plant and Equipment supplied and of the work executed.

27.2 The Defect Liability Period shall be eighteen (18) months from the date of Completion of the Facilities (or any part thereof) or twelve (12) months from the date of Operational Acceptance of the Facilities (or any part thereof), whichever first occurs, unless specified otherwise in the SCC.

If during the Defect Liability Period any defect should be found in the design, engineering, materials and workmanship of the Plant and Equipment supplied or of the work executed by the Implementing Partner, the Implementing Partner shall promptly, in consultation and agreement with CESL regarding appropriate remedying of the defects, and at its cost, repair, replace or otherwise make good (as the Implementing Partner shall, at its discretion, determine) such defect as well as any damage to the Facilities caused by such defect. The Implementing Partner shall not be responsible for the repair, replacement or making good of any defect or of any damage to the Facilities arising out of or resulting from any of the following causes:

(a) improper operation or maintenance of the Facilities by CESL

(b) operation of the Facilities outside specifications provided in the Contract.

(c) Normal wear and tear.

27.3 The Implementing Partner’s obligations under this GCC Clause 27 shall not apply to

(a) any materials that are supplied by CESL under GCC Sub-Clause 21.2 (CESL-Supplied Plant, Equipment and Materials), are normally consumed in operation, or have a normal life shorter than the Defect Liability Period stated herein.

(b) any designs, specifications or other data designed, supplied or specified by or on behalf of CESL or any matters for which the Implementing Partner has disclaimed responsibility herein.

(c) any other materials supplied or any other work executed by or on behalf of the CESL, except for the work executed by CESL under GCC Sub-Clause 27.7.

27.4 CESL shall give the Implementing Partner a notice stating the nature of any such defect together with all available evidence thereof, promptly following the discovery thereof. CESL shall afford all reasonable opportunity for the Implementing Partner to inspect any such defect.

27.5 CESL shall afford the Implementing Partner all necessary access to the Facilities and the Site to enable the Implementing Partner to perform its obligations under this GCC Clause 27. The Implementing Partner may, with the consent of CESL, remove from the Site any Plant and Equipment or any part of the Facilities that are defective if the nature of the defect, and/or any damage to the Facilities caused by the defect, is such that repairs cannot be expeditiously carried out at the Site.

27.6 If the repair, replacement or making good is of such a character that it may affect the efficiency of the Facilities or any part thereof, CESL may give to the Implementing Partner a notice requiring that tests of the defective part of the Facilities shall be made by the Implementing Partner immediately upon
completion of such remedial work, whereupon the Implementing Partner shall carry out such tests.

If such part fails the tests, the Implementing Partner shall carry out further repair, replacement or making good (as the case may be) until that part of the Facilities passes such tests. The tests in character shall in any case be not less than what has already been agreed by CESL and the Implementing Partner for the original equipment/part of the Facilities.

27.7 If the Implementing Partner fails to commence the work necessary to remedy such defect or any damage to the Facilities caused by such defect within a reasonable time (which shall in no event be considered to be less than fifteen (15) days), CESL may, following notice to the Implementing Partner, proceed to do such work, and the reasonable costs incurred by CESL in connection therewith shall be paid to CESL by the Implementing Partner or may be deducted by CESL from any monies due to the Implementing Partner or claimed under the Performance Security.

27.8 If the Facilities or any part thereof cannot be used by reason of such defect and/or making good of such defect, the Defect Liability Period of the Facilities or such part, as the case may be, shall be extended by a period equal to the period during which the Facilities or such part cannot be used by CESL because of any of the aforesaid reasons. Upon correction of the defects in the Facilities or any part thereof by repair/replacement, such repair/replacement shall have the Defect Liability Period extended by a period of twelve (12) months from the time such replacement/repair of the Facilities or any part thereof.

27.9 Except as provided in GCC Clauses 27 and 33 (Loss of or Damage to Property / Accident or Injury to Workers/Indemnification), the Implementing Partner shall be under no liability whatsoever and howsoever arising, and whether under the Contract or at law, in respect of defects in the Facilities or any part thereof, the Plant and Equipment, design or engineering or work executed that appear after Completion of the Facilities or any part thereof, except where such defects are the result of the gross negligence, fraud, criminal or wilful action of the Implementing Partner.

27.10 In addition, the Implementing Partner shall also provide an extended warranty for any such component of the Facilities and during the period of time as may be specified in the SCC. Such obligation shall be in addition to the defect liability specified under GCC Sub-Clause 27.2.

28. Functional Guarantees

28.1 The Implementing Partner guarantees that during the Guarantee Test, the Facilities and all parts thereof shall attain the Functional Guarantees specified in Appendix 8 (Functional Guarantees) to the Contract Agreement, subject to and upon the conditions therein specified.

28.2 If, for reasons attributable to the Implementing Partner, the guaranteed level of the Functional Guarantees specified in Appendix 8 (Functional Guarantees) to the Contract Agreement are not met either in whole or in part, the Implementing Partner shall, within a mutually agreed time, at its cost and expense make such changes, modifications and/or additions to the Plant or any part thereof as may be necessary to meet such Guarantees. The Implementing Partner shall notify CESL upon completion of the necessary changes, modifications and/or additions, and shall seek CESL’s consent to repeat the Guarantee Test. If the specified Functional Guarantees are not established even during the repeat of the Guarantee Test, CESL may at its option, either

(a) Reject the Equipment and recover the payments already made, or

(b) Terminate the Contract pursuant to GCC Sub-Clause 42.2.2 and recover the payments already made, or
(c) Accept the equipment after levy of liquidated damages in accordance with the provisions specified in Appendix-8(Functional Guarantees) to the Contract Agreement.

28.3 In case CESL exercises its option to accept the equipment after levy of liquidated damages, the payment of liquidated damages under GCC Sub-Clause 28.2, up to the limitation of liability specified in the Appendix-8 (Functional Guarantees) to the Contract Agreement, shall completely satisfy the Implementing Partner’s guarantees under GCC Sub-Clause 28.2, and the Implementing Partner shall have no further liability whatsoever to CESL in respect thereof. Upon the payment of such liquidated damages by the Implementing Partner, the Project Manager shall issue the Operational Acceptance Certificate for the Facilities or any part thereof in respect of which the liquidated damages have been so paid.

29. Patent Indemnity

29.1 The Implementing Partner shall, subject to the CESL’s compliance with GCC Sub-Clause 29.2, indemnify and hold harmless the CESL and its employees and officers from and against any and all suits, actions or administrative proceedings, claims, demands, losses, damages, costs, and expenses of whatsoever nature, including attorney’s fees and expenses, which CESL may suffer as a result of any infringement or alleged infringement of any patent, utility model, registered design, trademark, copyright or other intellectual property right registered or otherwise existing at the date of the Contract by reason of: (a) the installation of the Facilities by the Implementing Partner or the use of the Facilities in the country where the Site is located; and (b) the sale of the products produced by the Facilities in any country.

Such indemnity shall not cover any use of the Facilities or any part thereof other than for the purpose indicated by or to be reasonably inferred from the Contract, any infringement resulting from the use of the Facilities or any part thereof, or any products produced thereby in association or combination with any other equipment, plant or materials not supplied by the Implementing Partner, pursuant to the Contract Agreement.

29.2 If any proceedings are brought or any claim is made against CESL arising out of the matters referred to in GCC Sub-Clause 29.1, CESL shall promptly give the Implementing Partner a notice thereof, and the Implementing Partner may at its own expense and in CESL’s name conduct such proceedings or claim and any negotiations for the settlement of any such proceedings or claim.

If the Implementing Partner fails to notify CESL within twenty-eight (28) days after receipt of such notice that it intends to conduct any such proceedings or claim, then CESL shall be free to conduct the same on its own behalf. Unless the Implementing Partner has so failed to notify CESL within the twenty-eight (28) day period, CESL shall make no admission that may be prejudicial to the defense of any such proceedings or claim.

CESL shall, at the Implementing Partner’s request, afford all available assistance to the Implementing Partner in conducting such proceedings or claim, and shall be reimbursed by the Implementing Partner for all reasonable expenses incurred in so doing.

29.3 CESL shall indemnify and hold harmless the Implementing Partner and its employees, officers and Sub-Implementing Partners from and against any and all suits, actions or administrative proceedings, claims, demands, losses, damages, costs, and expenses of whatsoever nature, including attorney’s fees and expenses, which the Implementing Partner may suffer as a result of any infringement or alleged infringement of any patent, utility model, registered design, trademark, copyright or other intellectual property right registered or otherwise existing at the date of the Contract arising out of or in connection with any design, data, drawing, specification, or other documents or materials provided or designed by or on behalf of CESL.
30. Limitation of Liability

30.1 Except in cases of criminal negligence or wilful misconduct,

(a) the Implementing Partner shall not be liable to the CESL, whether in contract, tort, or otherwise, for any indirect or consequential loss or damage, loss of use, loss of production, or loss of profits or interest costs, provided that this exclusion shall not apply to any obligation of the Implementing Partner to pay liquidated damages to CESL and

(b) the aggregate liability of the Implementing Partner to CESL, whether under the Contract, in tort or otherwise, shall not exceed the total Contract Price, provided that this limitation shall not apply to any obligation of the Implementing Partner to indemnify CESL with respect to patent infringement or as specified in SCC.

G. Risk Distribution

31. Transfer of Ownership

31.1 Ownership of the Plant and Equipment (including spare parts) procured in the country where the Site is located shall be transferred to CESL when the Plant and Equipment are reached at site.

31.2 Ownership of the Implementing Partner’s Equipment used by the Implementing Partner and its Sub Implementing Partners in connection with the Contract shall remain with the Implementing Partner or its Sub Implementing Partners.

31.3 Ownership of any Plant and Equipment in excess of the requirements for the Facilities shall revert to the Implementing Partner upon Completion of the Facilities or at such earlier time when CESL and the Implementing Partner agree that the Plant and Equipment in question are no longer required for the Facilities, provided quantity of any Plant and Equipment specifically stipulated in the Contract shall be the property of CESL whether or not incorporated in the Facilities.

31.4 Disposal of surplus material

Ownership of any Plant and Equipment in excess of the requirements for the Facilities (i.e. surplus material) shall revert to the Contractor upon Completion of the Facilities and Guarantee Test or at such earlier time when CESL and the Contractor agree that the Plant and Equipment in question are no longer required for the Facilities, provided quantity of any Plant and Equipment specifically stipulated in the Contract shall be the property of CESL whether or not incorporated in the Facilities. The Contractor shall remove from the site such surplus material brought by him in pursuance of the Contract, subject to the Contractor producing the necessary clearance from the relevant authorities (Customs, Excise etc.), if required by law, in respect of re-export or disposal of the surplus material locally. The liability for the payment of the applicable taxes/duties, if any, on the surplus material so re-exported and/or disposed locally shall be that of the Contractor.

The Contractor shall also indemnify to keep CESL harmless from any act of omission or negligence on the part of the Contractor in following the statutory requirements with regard to removal/disposal of surplus material. The Indemnity Bond shall be furnished by contractor as per proforma enclosed in Section-VII (Forms and Procedure) as Form No. 14. Further, in case the laws require CESL to take prior permission of the relevant Authorities before handing over the surplus material to the Contractor, the same
shall be obtained by the Contractor on behalf of CESL.

Notwithstanding the transfer of ownership of the Plant and Equipment, the responsibility for care and custody thereof together with the risk of loss or damage thereto shall remain with the Implementing Partner pursuant to GCC Clause 32 (Care of Facilities) hereof until Completion of the Facilities or the part thereof in which such Plant and Equipment are incorporated.

31.5 In case of two/three Contracts entered into between CESL and the Implementing Partner as per GCC Sub-Clause 3.6 or where CESL hands over his equipment to the Implementing Partner for executing the Contract, then the Implementing Partner shall at the time of taking delivery of the Equipment through Bill of Lading or other despatch documents furnish Trust Receipt for Plant, Equipment and Materials and also execute an Indemnity Bond in favour of CESL in the form acceptable to CESL for keeping the equipment in safe custody and to utilise the same exclusively for the purpose of the said Contract. Proforma for the Trust Receipt and Indemnity bond. The CESL shall also issue a separate Authorisation Letter to the Implementing Partner to enable him to take physical delivery of plant, equipment and materials from CESL.

32 Care of Facilities

32.1 The Implementing Partner shall be responsible for the care and custody of the Facilities or any part thereof until the date of Completion of the Facilities pursuant to GCC Clause 24 (Completion of the Facilities) or, where the Contract provides for Completion of the Facilities in parts, until the date of Completion of the relevant part, and shall make good at its own cost any loss or damage that may occur to the Facilities or the relevant part thereof from any cause whatsoever during such period. The Implementing Partner shall also be responsible for any loss or damage to the Facilities caused by the Implementing Partner or its Sub Implementing Partners in the course of any work carried out, pursuant to GCC Clause 27 (Defect Liability). Notwithstanding the foregoing, the Implementing Partner shall not be liable for any loss or damage to the Facilities or that part thereof caused by reason of any of the matters specified or referred to in paragraphs (a), (b) and (c) of GCC Sub-Clausules 32.2 and 38.1.

32.2 If any loss or damage occurs to the Facilities or any part thereof or to the Implementing Partner’s temporary facilities by reason of

(a) (insofar as they relate to the country where the Site is located) nuclear reaction, nuclear radiation, radioactive contamination, pressure wave caused by aircraft or other aerial objects, or any other occurrences that an experienced Implementing Partner could not reasonably foresee, or if reasonably foreseeable could not reasonably make provision for or insure against, insofar as such risks are not normally insurable on the insurance market and are mentioned in the general exclusions of the policy of insurance, including War Risks and Political Risks, taken out under GCC Clause 34 (Insurance) hereof.

(b) any use or occupation by CESL or any third party (other than a Sub Implementing Partner) authorized by CESL of any part of the Facilities.

(c) Any use of or reliance upon any design, data or specification provided or designated by or on behalf of CESL, or any such matter for which the Implementing Partner has disclaimed responsibility herein,

CESL shall pay to the Implementing Partner all sums payable in respect of the Facilities executed, notwithstanding that the same be lost, destroyed or damaged, and will pay to the Implementing Partner the replacement value of all temporary facilities and all parts thereof lost, destroyed or damaged. If CESL requests the Implementing Partner in writing to make good any loss or damage to the Facilities thereby
occasioned, the Implementing Partner shall make good the same at the cost of CESL in accordance with GCC Clause 39 (Change in the Facilities). If the CESL does not request the Implementing Partner in writing to make good any loss or damage to the Facilities thereby occasioned, CESL shall either request a change in accordance with GCC Clause 39 (Change in the Facilities), excluding the performance of that part of the Facilities thereby lost, destroyed or damaged, or, where the loss or damage affects a substantial part of the Facilities, CESL shall terminate the Contract pursuant to GCC Sub-Clause 42.1 (Termination for CESL’s Convenience) hereof, except that the Implementing Partner shall have no entitlement to profit under paragraph (e) of GCC Sub-Clause 42.1.3 in respect of any unexecuted Facilities as at the date of termination.

32.3 The Implementing Partner shall be liable for any loss of or damage to any Implementing Partner’s Equipment, or any other property of the Implementing Partner used or intended to be used for purposes of the Facilities, except (i) as mentioned in GCC Sub-Clause 32.2 (with respect to the Implementing Partner’s temporary facilities), and (ii) where such loss or damage arises by reason of any of the matters specified in GCC Sub-Clauses 32.2(b) and (c) and 38.1.

32.3 With respect to any loss or damage caused to the Facilities or any part thereof or to the Implementing Partner’s Equipment by reason of any of the matters specified in GCC Sub-Clause 38.1, the provisions of GCC Sub-Clause 38.3 shall apply.

33 Loss of or Damage to Property; Accident or Injury to workers; Indemnification

33.1 Subject to GCC Sub - Clause 33.3, the Implementing Partner shall indemnify and hold harmless CESL and its employees and officers from and against any and all suits, actions or administrative proceedings, claims, demands, losses, damages, costs, and expenses of whatsoever nature, including attorney’s fees and expenses, in respect of the death or injury of any person or loss of or damage to any property (other than the Facilities whether accepted or not), arising in connection with the supply and installation of the Facilities and by reason of the negligence of the Implementing Partner or its Sub-Implementing Partners, or their employees, officers or agents, except any injury, death or property damage caused by the negligence of CESL, its Implementing Partners, employees, officers or agents.

33.2 If any proceedings are brought or any claim is made against CESL that might subject the Implementing Partner to liability under GCC Sub-Clause33.1, CESL shall promptly give the Implementing Partner a notice thereof and the Implementing Partner may at its own expense and in CESL’s name conduct such proceedings or claim and any negotiations for the settlement of any such proceedings or claim.

If the Implementing Partner fails to notify CESL within twenty-eight (28) days after receipt of such notice that it intends to conduct any such proceedings or claim, then CESL shall be free to conduct the same on its own behalf. Unless the Implementing Partner has so failed to notify CESL within the twenty-eight (28) day period, CESL shall make no admission that may be prejudicial to the defense of any such proceedings or claim.

CESL shall, at the Implementing Partner’s request, afford all available assistance to the Implementing Partner in conducting such proceedings or claim, and shall be reimbursed by the Implementing Partner for all reasonable expenses incurred in so doing.

33.3 CESL shall indemnify and hold harmless the Implementing Partner and its employees, officers and Sub-Implementing Partners from any liability for loss of or damage to property of the CESL, other than the Facilities not yet taken over, that is caused by fire, explosion or any other perils, in excess of the amount recoverable from insurances procured under GCC Clause 34 (Insurances), provided that such fire, explosion or other perils were not caused by any act or failure of the Implementing Partner.

33.4 The party entitled to the benefit of an indemnity under this GCC Clause33 shall take all reasonable
measures to mitigate any loss or damage which has occurred. If the party fails to take such measures, the other party’s liabilities shall be correspondingly reduced.

34 Insurance

34.1 To the extent specified in Appendix 3 (Insurance Requirements) to the Contract Agreement, the Implementing Partner shall at its expense take out and maintain in effect, or cause to be taken out and maintained in effect, during the performance of the Contract, the insurances set forth below in the sums and with the deductibles and other conditions specified in the said Appendix. The identity of the insurers and the form of the policies shall be subject to the approval of the CESL, who should not Unreasonably withhold such approval.

(a) Cargo Insurance During Transport

(b) Installation All Risks Insurance
Covering physical loss or damage to the Facilities at the Site, occurring prior to Completion of the Facilities, with an extended maintenance coverage for the Implementing Partner’s liability in respect of any loss or damage occurring during the Defect Liability Period while the Implementing Partner is on the Site for the purpose of performing its obligations during the Defect Liability Period.

(c) Third Party Liability Insurance
Covering bodily injury or death suffered by third parties (including CESL’s personnel) and loss of or damage to property occurring in connection with the supply and installation of the Facilities.

(d) Automobile Liability Insurance

Such other insurances as may be specifically agreed upon by the parties hereto as listed in the said Appendix 3.

34.2 CESL shall be named as co-insured under all insurance policies taken out by the Implementing Partner pursuant to GCC Sub-Clause 34.1, except for the Third Party Liability, Workers’ Compensation and CESL’s Liability Insurances, and the Implementing Partner’s Sub Implementing Partners shall be named as co-insured’s under all insurance policies taken out by the Implementing Partner pursuant to GCC Sub-Clause 34.1 except for the Cargo Insurance During Transport, Workers’ Compensation and CESL’s Liability Insurances. All insurers’ rights of subrogation against such co-insured’s for losses or claims arising out of the performance of the Contract shall be waived under such policies.
34.3 The Implementing Partner shall, in accordance with the provisions of Appendix 3 (Insurance Requirements) to the Contract Agreement, deliver to CESL certificates of insurance (or copies of the insurance policies) as evidence that the required policies are in full force and effect. The certificates shall provide that no less than twenty-one (21) days’ notice shall be given to CESL by insurers prior to cancellation or material modification of a policy.

34.4 The Implementing Partner shall ensure that, where applicable, its Sub Implementing Partner(s) shall take out and maintain in effect adequate insurance policies for their personnel and vehicles and for work executed by them under the Contract, unless such Sub Implementing Partners are covered by the policies taken out by the Implementing Partner.

34.5 CESL shall at its expense take out and maintain in effect during the performance of the Contract those insurances specified in Appendix 3 (Insurance Requirements) to the Contract Agreement.

34.6 If the Implementing Partner fails to take out and/or maintain in effect the insurances referred to in GCC Sub-Clause 34.1, CESL may take out and maintain in effect any such insurances and may from time to time deduct from any amount due the Implementing Partner under the Contract any premium that CESL shall have paid to the insurer, or may otherwise recover such amount as a debt due from the Implementing Partner. If CESL fails to take out and/or maintain in effect the insurances referred to in GCC 34.5, the Implementing Partner may take out and maintain in effect any such insurances and may from time to time deduct from any amount due CESL under the Contract any premium that the Implementing Partner shall have paid to the insurer, or may otherwise recover such amount as a debt due from CESL. If the Implementing Partner fails to or is unable to take out and maintain in effect any such insurances, the Implementing Partner shall nevertheless have no liability or responsibility towards CESL, and the Implementing Partner shall have full recourse against CESL for any and all liabilities of CESL herein.

34.7 Unless otherwise provided in the Contract, the Implementing Partner shall prepare and conduct all and any claims made under the policies effected by it pursuant to this GCC Clause 34, and all monies payable by any insurers shall be paid to the Implementing Partner as per the procedure outlined in GCC Sub- Clause 34.8 below. CESL shall give to the Implementing Partner all such reasonable assistance as may be required by the Implementing Partner. With respect to insurance claims in which CESL’s interest is involved, the Implementing Partner shall not give any release or make any compromise with the insurer without the prior written consent of CESL. With respect to insurance claims in which the Implementing Partner’s interest is involved, CESL shall not give any release or make any compromise with the insurer without the prior written consent of the Implementing Partner.

34.8 (i) wherever total damages/loss of equipment/material, would occur, the Implementing Partner will be entitled to payment of all payments received from the underwriters except the following amounts:

   (a) The amount paid to the Implementing Partner under the Contract in respect of equipment/material damaged/lost (excluding the pro-rata initial advance) but including the entire amount of escalation, if any, already paid to the Contractor.

   (b) Custom Duties and other taxes and duties which have already been paid by CESL.

In the event the claim money settled, is less than the total of the amount in a & b above, then the entire claim money settled will be retained by CESL and the Implementing Partner will forthwith pay CESL the short fall amount between the claim money and the total of amounts as per a & b mentioned above.

Subsequent payments, if any, due under the Contract shall be regulated by the relevant terms of payment.
(II) In case of damage to any equipment/material during any stage, the Implementing Partner upon rectification of the damaged equipment to the satisfaction of the CESL shall be paid to the extent of full claims settled by the underwriters.

35 Unforeseen Conditions

35.1 If, during the execution of the Contract, the Implementing Partner shall encounter on the Site any physical conditions (other than climatic conditions) or artificial obstructions that could not have been reasonably foreseen prior to the date of the Contract Agreement by an experienced Implementing Partner on the basis of reasonable examination of the data relating to the Facilities (including any data as to boring tests) provided by CESL, and on the basis of information that it could have obtained from a visual inspection of the Site (if access thereto was available) or other data readily available to it relating to the Facilities, and if the Implementing Partner determines that it will in consequence of such conditions or obstructions incur additional cost and expense or require additional time to perform its obligations under the Contract that would not have been required if such physical conditions or artificial obstructions had not been encountered, the Implementing Partner shall promptly, and before performing additional work or using additional Plant and Equipment or Implementing Partner’s Equipment, notify the Project Manager in writing of

a) the physical conditions or artificial obstructions on the Site that could not have been reasonably foreseen.

b) the additional work and/or Plant and Equipment and/or Implementing Partner’s Equipment required, including the steps which the Implementing Partner will or proposes to take to overcome such conditions or obstructions.

c) the extent of the anticipated delay.

d) the additional cost and expense that the Implementing Partner is likely to incur.

On receiving any notice from the Implementing Partner under this GCC Sub-Clause 35.1, the Project Manager shall promptly consult with CESL and Implementing Partner and decide upon the actions to be taken to overcome the physical conditions or artificial obstructions encountered. Following such consultations, the Project Manager shall instruct the Implementing Partner, with a copy to CESL, of the actions to be taken.

35.2 Any reasonable additional cost and expense incurred by the Implementing Partner in following the instructions from the Project Manager to overcome such physical conditions or artificial obstructions referred to in GCC Sub-Clause 35.1 shall be paid by the CESL to the Implementing Partner as an addition to the Contract Price.

35.3 If the Implementing Partner is delayed or impeded in the performance of the Contract because of any such physical conditions or artificial obstructions referred to in GCC Sub-Clause 35.1, the Time for Completion shall be extended in accordance with GCC Clause 40 (Extension of Time for Completion).

36 Change in Laws and Regulations

36.1 If, after the date seven (7) days prior to the date of Bid submission, in the country where the Site is located, any law, regulation, ordinance, order or by-law having the force of law is enacted, promulgated, abrogated or changed (which shall be deemed to include any change in interpretation or application by the competent authorities) that subsequently affects the costs and expenses of the Implementing Partner and/or the Time for Completion, the Contract Price shall be correspondingly increased or decreased, and/or the Time for Completion shall be reasonably adjusted to the extent that the Implementing Partner has
thereby been affected in the performance of any of its obligations under the Contract. However, these adjustments would be restricted to direct transactions between CESL and the Implementing Partner/Assignee of Foreign Implementing Partner (if applicable). These adjustments shall not be applicable on procurement of raw materials, intermediary components etc. by the Implementing Partner/Assignee of Foreign Implementing Partner and shall also not be applicable on bought out items despatched directly from sub-vendor works to site. Further, no adjustment of the Contract Price and/or payment or reimbursement of taxes, duties or levies shall be made on account of variation in or withdrawal of Deemed Export benefits. Notwithstanding the foregoing, such additional or reduced costs shall not be separately paid or credited if the same has already been accounted for in the price adjustment provisions where applicable, in accordance with the Appendix 2 to the Contract Agreement.

37 Force Majeure

37.1 “Force Majeure” shall mean any event beyond the reasonable control of CESL or of the Implementing Partner, as the case may be, and which is unavoidable notwithstanding the reasonable care of the party affected.

37.2 If either party is prevented, hindered or delayed from or in performing any of its obligations under the Contract by an event of Force Majeure, then it shall notify the other in writing of the occurrence of such event and the circumstances thereof within fourteen (14) days after the occurrence of such event.

37.3 The party who has given such notice shall be excused from the performance or punctual performance of its obligations under the Contract for so long as the relevant event of Force Majeure continues and to the extent that such party’s performance is prevented, hindered or delayed. The Time for Completion shall be extended in accordance with GCC Clause 40 (Extension of Time for Completion).

37.4 The party or parties affected by the event of Force Majeure shall use reasonable efforts to mitigate the effect thereof upon its or their performance of the Contract and to fulfil its or their obligations under the Contract, but without prejudice to either party’s right to terminate the Contract under GCC Sub-Clauses 37.6 and 38.5.

37.5 No delay or non performance by either party hereto caused by the occurrence of any event of Force Majeure shall

   a) constitute a default or breach of the Contract

   b) (subject to GCC Sub-Clauses 32.2, 38.3 and 38.4) give rise to any claim for damages or additional cost or expense occasioned thereby

If and to the extent that such delay or non-performance is caused by the occurrence of an event of Force Majeure.

37.6 If the performance of the Contract is substantially prevented, hindered or delayed for a single period of more than sixty (60) days or an aggregate period of more than one hundred and twenty (120) days on account of one or more events of Force Majeure during the currency of the Contract, the parties will attempt to develop a mutually satisfactory solution, failing which the dispute shall be resolved in accordance with GCC Clause 6.

37.7 Notwithstanding GCC Sub-Clause 37.5, Force Majeure shall not apply to any obligation of the CESL to make payments to the Implementing Partner herein.

38 War Risks

38.1 “War Risks” shall mean any of the following events occurring or existing in or near the country (or
countries) where the Site is located:

a) war, hostilities or warlike operations (whether a state of war is declared or not), invasion, act of foreign enemy and civil war

b) rebellion, revolution, insurrection, mutiny, usurpation of civil or military government, conspiracy, riot, civil commotion and terrorist acts, and

c) any explosion or impact of any mine, bomb, shell, grenade or other projectile, missile, munitions or explosive of war.

38.2 Notwithstanding anything contained in the Contract, the Implementing Partner shall have no liability whatsoever for or with respect to

a) destruction of or damage to Facilities, Plant & Equipment, or any part thereof

b) destruction of or damage to property of CESL or any third party

c) injury or loss of life

if such destruction, damage, injury or loss of life is caused by any War Risks, and CESL shall indemnify and hold the Implementing Partner harmless from and against any and all claims, liabilities, actions, lawsuits, damages, costs, charges or expenses arising in consequence of or in connection with the same.

38.3 If the Facilities or any Plant and Equipment or Implementing Partner’s Equipment or any other property of the Implementing Partner used or intended to be used for the purposes of the Facilities shall sustain destruction or damage by reason of any War Risks, CESL shall pay the Implementing Partner for

a) any part of the Facilities or the Plant and Equipment so destroyed or damaged (to the extent not already paid for by CESL)

b) replacing or making good any Implementing Partner’s Equipment or other property of the Implementing Partner so destroyed or damaged so far as may be required by CESL, and as may be necessary for completion of the Facilities,

c) replacing or making good any such destruction or damage to the Facilities or the Plant and Equipment or any part thereof.

If CESL does not require the Implementing Partner to replace or make good any such destruction or damage to the Facilities, CESL shall either request a change in accordance with GCC Clause 39 (Change in the Facilities), excluding the performance of that part of the Facilities thereby destroyed or damaged or, where the loss, destruction or damage affects a substantial part of the Facilities, shall terminate the Contract, pursuant to GCC Sub-Clause 42.1 (Termination for CESL’s Convenience).

38.4 Notwithstanding anything contained in the Contract, CESL shall pay the Implementing Partner for any increased costs or incidentals to the execution of the Contract that are in any way attributable to, consequent on, resulting from, or in any way connected with any War Risks, provided that the Implementing Partner shall as soon as practicable notify CESL in writing of any such increased cost.

38.5 If during the performance of the Contract any War Risks shall occur that financially or otherwise materially affect the execution of the Contract by the Implementing Partner, the Implementing Partner shall use its reasonable efforts to execute the Contract with due and proper consideration given to the safety of its and its Sub Implementing Partners’ personnel engaged in the work on the Facilities, provided,
however, that if the execution of the work on the Facilities becomes impossible or is substantially prevented for a single period of more than sixty (60) days or an aggregate period of more than one hundred and twenty (120) days on account of any War Risks, the parties will attempt to develop a mutually satisfactory solution, failing which the dispute will be resolved in accordance with GCC Clause 6.

38.6 In the event of termination pursuant to GCC Sub-Clauses 38.3, the rights and obligations of CESL and the Implementing Partner shall be specified in GCC Sub-Clauses 42.1.2 and 42.1.3, except that the Implementing Partner shall have no entitlement to profit under paragraph (e) of GCC Sub-Clause 42.1.3 in respect of any unexecuted Facilities as of the date of termination.

H. Change in Contract Element

39.1 Changes in the Facilities

39.1.1 CESL shall have the right to propose, and subsequently require, that the Project Manager order the Implementing Partner from time to time during the performance of the Contract to make any change, modification, addition or deletion to, in or from the Facilities (hereinafter called “Change”), provided that such Change falls within the general scope of the Facilities and does not constitute unrelated work and that it is technically practicable, taking into account both the state of advancement of the Facilities and the technical compatibility of the Change envisaged with the nature of the Facilities as specified in the Contract.

39.1.2 The Implementing Partner may from time to time during its performance of the Contract propose to CESL (with a copy to the Project Manager) any Change that the Implementing Partner considers necessary or desirable to improve the quality, efficiency or safety of the Facilities. CESL may at its discretion approve or reject any Change proposed by the Implementing Partner.

39.1.3 Notwithstanding GCC Sub-Clauses 39.1.1 and 39.1.2, no change made necessary because of any default of the Implementing Partner in the performance of its obligations under the Contract shall be deemed to be a Change, and such change shall not result in any adjustment of the Contract Price or the Time for Completion.

39.1.4 The procedure on how to proceed with and execute Changes is specified in GCC Sub-Clauses 39.2 and 39.3.

39.2 Changes Originating from CESL

If CESL proposes a Change pursuant to GCC Sub-Clause 39.1.1, it shall send to the Implementing Partner a “Request for Change Proposal,” requiring the Implementing Partner to prepare and furnish to the Project Manager as soon as reasonably practicable a “Change Proposal,” which shall include the following:

a) brief description of the Change
b) effect on the Time for Completion
c) estimated cost of the Change
d) effect on Functional Guarantees (if any)
e) effect on any other provisions of the Contract.

39.2.2 The pricing of any Change shall, as far as practicable, be calculated in accordance with the rates and prices included in the Contract. If the rates and prices of any change are in the Contract, the parties thereto shall agree on specific rates for the valuation of the Change.

39.2.3 If before or during the preparation of the Change Proposal it becomes apparent that the aggregate effect of compliance therewith and with all other Change Orders that have already become binding upon the Implementing Partner under this GCC Clause 39 would be to increase or decrease the Contract Price
as originally set forth in Article 2 (Contract Price) of the Contract Agreement by more than fifteen (15) percent, the Implementing Partner may give a written notice of objection thereto prior to furnishing the Change Proposal as aforesaid. If CESL accepts the Implementing Partner’s objection, CESL and the Implementing Partner shall agree on specific rates for valuation of the change.

39.2.4 Upon receipt of the Change Proposal, CESL and the Implementing Partner shall mutually agree upon all matters therein contained including agreement on rates if such rates are not available in the Contract or if the limit of 15% set forth in Clause 39.2.3 has been exceeded. Within fourteen (14) days after such agreement, CESL shall, if it intends to proceed with the Change, issue the Implementing Partner with a Change Order.

If CESL is unable to reach a decision within fourteen (14) days, it shall notify the Implementing Partner with details of when the Implementing Partner can expect a decision.

If CESL decides not to proceed with the Change for whatever reason, it shall, within the said period of fourteen (14) days, notify the Implementing Partner accordingly.

39.2.5 If CESL and the Implementing Partner cannot reach agreement on the price for the Change, an equitable adjustment to the Time for Completion, or any other matters identified in the Change Proposal, CESL may nevertheless instruct the Implementing Partner to proceed with the Change by issue of a “Pending Agreement Change Order.”

Upon receipt of a Pending Agreement Change Order, the Implementing Partner shall immediately proceed with effecting the Changes covered by such Order. The parties shall thereafter attempt to reach agreement on the outstanding issues under the Change Proposal.

39.3 Changes Originating from Implementing Partner

39.3.1 If the Implementing Partner proposes a Change pursuant to GCC Sub-Clause 39.1.2, the Implementing Partner shall submit to the Project Manager a written “Application for Change Proposal,” giving reasons for the proposed Change and including the information specified in GCC Sub-Clause 39.2.1.

Upon receipt of the Application for Change Proposal, the parties shall follow the procedures outlined in GCC Sub-Claus es 39.2.4 and 39.2.5

40. Extension of Time for Completion

40.1 The Time(s) for Completion specified in the SCC shall be extended if the Implementing Partner is delayed or impeded in the performance of any of its obligations under the Contract by reason of any of the following:

a) any Change in the Facilities as provided in GCC Clause 39 (Change in the Facilities)

b) any occurrence of Force Majeure as provided in GCC Clause 37 (Force Majeure), unforeseen conditions as provided in GCC Clause 35 (Unforeseen Conditions), or other occurrence of any of the matters specified or referred to in paragraphs (a), (b) and (c) of GCC Sub-Clause 32.2

c) any suspension order given by CESL under GCC Clause 41 (Suspension) hereof or reduction in the rate of progress pursuant to GCC Sub-Clause 41.2 or

d) any changes in laws and regulations as provided in GCC Clause 36 (Change in Laws and
Regulations) or

e) any default or breach of the Contract by CESL, specifically including failure to supply the items listed in Appendix 6 (Scope of Works and Supply by CESL) to the Contract Agreement, or any activity, act or omission of any other Implementing Partners employed by CESL or

f) any other matter specifically mentioned in the Contract;

by such period as shall be fair and reasonable in all the circumstances and as shall fairly reflect the delay or impediment sustained by the Implementing Partner.

40.2 Except where otherwise specifically provided in the Contract, the Implementing Partner shall submit to the Project Manager a notice of a claim for an extension of the Time for Completion, together with particulars of the event or circumstance justifying such extension as soon as reasonably practicable after the commencement of such event or circumstance. As soon as reasonably practicable after receipt of such notice and supporting particulars of the claim, CESL and the Implementing Partner shall agree upon the period of such extension. In the event that the Implementing Partner does not accept CESL’s estimate of a fair and reasonable time extension, the Implementing Partner shall be entitled to refer the matter to the Adjudicator, pursuant to GCC Sub-Clause 6.1 (Adjudicator).

40.3 The Implementing Partner shall at all times use its reasonable efforts to minimize any delay in the performance of its obligations under the Contract.

41. Suspension

41.1 CESL/ Project Manager may, by notice to the Implementing Partner, order the Implementing Partner to suspend performance of any or all of its obligations under the Contract. Such notice shall specify the obligation of which performance is to be suspended, the effective date of the suspension and the reasons therefore. The Implementing Partner shall thereupon suspend performance of such obligation (except those obligations necessary for the care or preservation of the Facilities) until ordered in writing to resume such performance by the Project Manager/ CESL.

If, by virtue of a suspension order given by the Project Manager/CESL other than by reason of the Implementing Partner’s default or breach of the Contract, the Implementing Partner’s performance of any of its obligations is suspended for an aggregate period of more than ninety (90) days, then at any time thereafter and provided that at that time such performance is still suspended, the Implementing Partner may give a notice to the Project Manager requiring that CESL shall, within twenty-eight (28) days of receipt of the notice, order the resumption of such performance or request and subsequently order a change in accordance with GCC Clause 39 (Change in the Facilities), excluding the performance of the suspended obligations from the Contract.

If CESL fails to do so within such period, the Implementing Partner may, by a further notice to the Project Manager, elect to treat the suspension, where it affects a part only of the Facilities, as a deletion of such part in accordance with GCC Clause 39 (Change in the Facilities) or, where it affects the whole of the Facilities, as termination of the Contract under GCC Sub-Clause 42.1 (Termination for CESL’s Convenience).

41.2 If

a) CESL has failed to pay the Implementing Partner any sum due under the Contract within the specified period, has failed to approve any invoice or supporting documents without just cause pursuant to Appendix 1 (Terms and Procedures of Payment) to the Contract Agreement, or commits a substantial breach of the Contract, the Implementing Partner may give a notice to CESL
that requires payment of such sum, requires approval of such invoice or supporting documents, or specifies the breach and requires CESL to remedy the same, as the case may be. If CESL fails to pay such sum, fails to approve such invoice or supporting documents or give its reasons for withholding such approval, or fails to remedy the breach or take steps to remedy the breach within fourteen (14) days after receipt of the Implementing Partner’s notice or

b) the Implementing Partner is unable to carry out any of its obligations under the Contract for any reason attributable to CESL, including but not limited to CESL’s failure to provide possession of or access to the Site or other areas in accordance with GCC Sub-Clause 10.2, or failure to obtain any governmental permit necessary for the execution and/or completion of the Facilities; then the Implementing Partner may by fourteen (14) days’ notice to CESL suspend performance of all or any of its obligations under the Contract, or reduce the rate of progress.

41.3 If the Implementing Partner’s performance of its obligations is suspended or the rate of progress is reduced pursuant to this GCC Clause 41, then the Time for Completion shall be extended in accordance with GCC Sub-Clause 40.1, and any and all additional costs or expenses incurred by the Implementing Partner as a result of such suspension or reduction shall be paid by CESL to the Implementing Partner in addition to the Contract Price, except in the case of suspension order or reduction in the rate of progress by reason of the Implementing Partner’s default or breach of the Contract.

41.4 During the period of suspension, the Implementing Partner shall not remove from the Site any Plant and Equipment, any part of the Facilities or any Implementing Partner’s Equipment, without the prior written consent of CESL.

42. Termination

42.1 Termination for CESL’s Convenience

42.1.1 CESL may at any time terminate the Contract for any reason by giving the Implementing Partner a notice of termination that refers to this GCC Sub-Clause 42.1.

42.1.2 Upon receipt of the notice of termination under GCC Sub-Clause 42.1.1, the Implementing Partner shall either immediately or upon the date specified in the notice of termination

(a) cease all further work, except for such work as CESL may specify in the notice of termination for the sole purpose of protecting that part of the Facilities already executed, or any work required to leave the Site in a clean and safe condition

(b) terminate all subcontracts, except those to be assigned to CESL pursuant to paragraph (d)(ii) below

(c) remove all Implementing Partner’s Equipment from the Site, repatriate the Implementing Partner’s and its Sub Implementing Partners’ personnel from the Site, remove from the Site any wreckage, rubbish and debris of any kind, and leave the whole of the Site in a clean and safe condition.

(d) In addition, the Implementing Partner, subject to the payment specified in GCC Sub-Clause 42.1.3, shall
(i) Deliver to CESL the parts of the Facilities executed by the Implementing Partner up to the date of termination

(ii) to the extent legally possible, assign to CESL all right, title and benefit of the Implementing Partner to the Facilities and to the Plant and Equipment as at the date of termination, and, as may be required by CESL, in any subcontracts concluded between the Implementing Partner and its Sub Implementing Partners

(iii) deliver to CESL all non-proprietary drawings, specifications and other documents prepared by the Implementing Partner or its SubImplementing Partners as at the date of termination in connection with the Facilities.

42.1.3 In the event of termination of the Contract under GCC Sub-Clause 42.1.1, CESL shall pay to the Implementing Partner the following amounts:

(a) the Contract Price, properly attributable to the parts of the Facilities executed by the Implementing Partner as of the date of termination

(b) the costs reasonably incurred by the Implementing Partner in the removal of the Implementing Partner’s Equipment from the Site and in the repatriation of the Implementing Partner’s and its SubImplementing Partners’ personnel.

(c) any amounts to be paid by the Implementing Partner to its SubImplementing Partners in connection with the termination of any subcontracts, including any cancellation charges.

(d) costs incurred by the Implementing Partner in protecting the Facilities and leaving the Site in a clean and safe condition pursuant to paragraph (a) of GCC Sub-Clause 42.1.2

(e) the cost of satisfying all other obligations, commitments and claims that the Implementing Partner may in good faith have undertaken with third parties in connection with the Contract and that are not covered by paragraphs (a) through (d) above.

42.2 Termination for Contractor or Implementing Partner’s Default

42.2.1 CESL, without prejudice to any other rights or remedies it may possess, may terminate the Contract forthwith in the following circumstances by giving a notice of termination and its reasons therefor to the Implementing Partner, referring to this GCC Sub-Clause 42.2:

(a) if the Implementing Partner becomes bankrupt or insolvent, has a receiving order issued against it, compounds with its creditors, or, if the Implementing Partner is a corporation, a resolution is passed or order is made for its winding up (other than a voluntary liquidation for the purposes of amalgamation or reconstruction), a receiver is appointed over any part of its undertaking or assets, or if the Implementing Partner takes or suffers any other analogous action in consequence of debt.

(b) if the Implementing Partner assigns or transfers the Contract or any right or interest therein in violation of the provision of GCC Clause 43 (Assignment).
(c) if the Implementing Partner, in the judgement of CESL has engaged in corrupt or fraudulent practices in competing for or in executing the Contract.

For the purpose of this Sub-Clause:

"corrupt practice" means the offering, giving, receiving or soliciting of any thing of value to influence the action of a public official in the procurement process or in contract execution.

"fraudulent practice" means a misrepresentation of facts in order to influence a procurement process or the execution of a contract to the detriment of CESL and includes collusive practice among Bidders (prior to or after bid submission) designed to establish bid prices at artificial non-competitive levels and to deprive CESL of the benefits of free and open competition.

42.2.2 If the Implementing Partner

(a) has abandoned or repudiated the Contract
(b) has without valid reason failed to commence work on the Facilities promptly or has suspended (other than pursuant to GCC Sub-Clause 41.2) the progress of Contract performance for more than twenty-eight (28) days after receiving a written instruction from CESL to proceed
(c) persistently fails to execute the Contract in accordance with the Contract or persistently neglects to carry out its obligations under the Contract without just cause
(d) refuses or is unable to provide sufficient materials, services or labor to execute and complete the Facilities in the manner specified in the program furnished under GCC Clause 18 (Program of Performance) at rates of progress that give reasonable assurance to CESL that the Implementing Partner can attain Completion of the Facilities by the Time for Completion as extended then CESL may, without prejudice to any other rights it may possess under the Contract, give a notice to the Implementing Partner stating the nature of the default and requiring the Implementing Partner to remedy the same. If the Implementing Partner fails to remedy or to take steps to remedy the same within fourteen (14) days of its receipt of such notice, then CESL may terminate the Contract forthwith by giving a notice of termination to the Implementing Partner that refers to this GCC Sub-Clause 42.2.

42.2.3 Upon receipt of the notice of termination under GCC Sub-Clauses 42.2.1 or 42.2.2, the Implementing Partner shall, either immediately or upon such date as is specified in the notice of termination,

cease all further work, except for such work as CESL may specify in the notice of termination for the sole purpose of protecting that part of the Facilities already executed, or any work required to leave the Site in a clean and safe condition

(a) terminate all subcontracts, except those to be assigned to CESL pursuant to paragraph (d) below
(b) deliver to CESL the parts of the Facilities executed by the Implementing Partner up to the date of termination.
(c) to the extent legally possible, assign to CESL all right, title and benefit of the Implementing Partner to the Works. and to the Plant and Equipment as at the date of termination, and, as may be required by CESL, in any subcontracts concluded between the Implementing Partner and its SubImplementing Partners.
(d) deliver to CESL all drawings, specifications and other documents prepared by the Implementing Partner or its SubImplementing Partners as at the date of termination in connection with the
42.2.4 CESL may enter upon the Site, expel the Implementing Partner, and complete the Facilities itself or by employing any third party. CESL may, to the exclusion of any right of the Implementing Partner over the same, take over and use with the payment of a fair rental rate to the Implementing Partner, with all the maintenance costs to the account of CESL and with an indemnification by CESL for all liability including damage or injury to persons arising out of CESL’s use of such equipment, any Implementing Partner’s Equipment owned by the Implementing Partner and on the Site in connection with the Facilities for such reasonable period as CESL considers expedient for the supply and installation of the Facilities.

Upon completion of the Facilities or at such earlier date as CESL thinks appropriate, CESL shall give notice to the Implementing Partner that such Implementing Partner’s Equipment will be returned to the Implementing Partner at or near the Site and shall return such Implementing Partner’s Equipment to the Implementing Partner in accordance with such notice. The Implementing Partner shall thereafter without delay and at its cost remove or arrange removal of the same from the Site.

42.2.5 Subject to GCC Sub-Clause 42.2.6, the Implementing Partner shall be entitled to be paid the Contract Price attributable to the Facilities executed as at the date of termination, the value of any unused or partially used Plant and Equipment on the Site, and the costs, if any, incurred in protecting the Facilities and in leaving the Site in a clean and safe condition pursuant to paragraph (a) of GCC Sub-Clause 42.2.3. Any sums due to CESL from the Implementing Partner accruing prior to the date of termination shall be deducted from the amount to be paid to the Implementing Partner under this Contract.

42.2.6 If CESL completes the Facilities, the cost of completing the Facilities by CESL shall be determined.

If the sum that the Implementing Partner is entitled to be paid, pursuant to GCC Sub-Clause 42.2.5, plus the reasonable costs incurred by CESL in completing the Facilities, exceeds the Contract Price, the Implementing Partner shall be liable for such excess.

If such excess is greater than the sums due to the Implementing Partner under GCC Sub-Clause 42.2.5, the Implementing Partner shall pay the balance to CESL, and if such excess is less than the sums due to the Implementing Partner under GCC Sub-Clause 42.2.5, CESL shall pay the balance to the Implementing Partner.

CESL and the Implementing Partner shall agree, in writing, on the computation described above and the manner in which any sums shall be paid.

42.3 Termination by Contractor or Implementing Partner

42.3.1 If

(a) CESL has failed to pay the Implementing Partner any sum due under the Contract within the specified period, has failed to approve any invoice or supporting documents without just cause pursuant to Appendix 1 (Terms and Procedures of Payment) of the Contract Agreement, or commits a substantial breach of the Contract, the Implementing Partner may give a notice to CESL that requires payment of such sum, requires approval of such invoice or supporting documents, or specifies the breach and requires CESL to remedy the same, as the case may be. If CESL fails to pay such sum, fails to approve such invoice or supporting documents or give its reasons for withholding such approval, fails to remedy the breach or take steps to remedy the breach within fourteen (14) days after receipt of the Implementing Partner’s notice, or
(b) the Implementing Partner is unable to carry out any of its obligations under the Contract for any reason attributable to CESL, including but not limited to CESL’s failure to provide possession of or access to the Site or other areas or failure to obtain any governmental permit necessary for the execution and/or completion of the Facilities which CESL is required to obtain as per provision of the Contract or as per relevant applicable laws of the country,

then the Implementing Partner may give a notice to CESL thereof, and if CESL has failed to pay the outstanding sum, to approve the invoice or supporting documents, to give its reasons for withholding such approval, or to remedy the breach within twenty-eight (28) days of such notice, or if the Implementing Partner is still unable to carry out any of its obligations under the Contract for any reason attributable to CESL within twenty-eight (28) days of the said notice, the Implementing Partner may by a further notice to CESL referring to this GCC Sub-Clause 42.3.1, forthwith terminate the Contract.

42.3.2 The Implementing Partner may terminate the Contract forthwith by giving a notice to CESL to that effect, referring to this GCC Sub-Clause 42.3.2, if CESL becomes bankrupt or insolvent, has a receiving order issued against it, compounds with its creditors, or, being a corporation, if a resolution is passed or order is made for its winding up (other than a voluntary liquidation for the purposes of amalgamation or reconstruction), a receiver is appointed over any part of its undertaking or assets, or if CESL takes or suffers any other analogous action in consequence of debt.

42.3.3 If the Contract is terminated under GCC Sub-Clauses 42.3.1 or 42.3.2, then the Implementing Partner shall immediately

2. BACKGROUND

India is at the cusp of an e-mobility revolution. The Government of India (GoI) is moving towards accelerated adoption of EVs to cut down its fuel import bills, carbon emissions and air pollution. It has announced a target to reach 30% EV adoption by 2030.

Government of India aims to augment public sector bus fleet with a view to strengthening, modernizing, and green public transport in India. An increase in the number of Electric buses on Indian roads will help to enhance economic development, commuter mobility, local production, reduce air pollution, climate change and increase in employment. Crucially, changing to Electric Buses will reduce fossil fuel import bills. For this Government of India has approved the PM-eBus Sewa scheme on 16th August 2023. The scheme aims to augment urban bus operations with central assistance of 20,000 crore for deploying 10,000 electric buses - underscoring India’s commitment to fostering sustainable transport solutions to achieve our decarbonization ambitions. The scheme shall also provide 10 years of operational support for buses besides associated bus infrastructure development and Green Urban Mobility initiatives. The administrative Ministry for this scheme is Ministry of Housing and Urban Affairs (MoHUA). This Bid document is being issued under the guidelines for PM-eBus Sewa, notified by MoHUA, and the guidelines can be accessed at the link: https://mohua.gov.in/upload/uploadfiles/files/PM-eBus-Sewa-Guidelines-Part-I.pdf

Payment Security Mechanism (PSM) will also be a part of the PM-eBus Sewa Scheme. As per the scheme guidelines, State Guarantee will be provided for payment of bus operations and States/ Union Territory (UT) shall agree to the PSM being developed by Government of India. Payment Security will be provided to the Operator as per the Concession Agreement signed between Authority and the Operator for procurement and operation of e-buses through Payment Security Mechanism being developed by GoI. Note on the proposed PSM under PM-eBus Sewa Scheme is in Annexure E. The Selected Bidder(s) has the option to execute the Concession Agreement only after the PSM has been notified by GoI.

MoHUA has aggregated the demand from the cities shortlisted under this scheme. After tendering 3,825 e-Buses in PM-eBus Sewa Tender 1. A total demand of 3,132 was consolidated from 10 States and 3 UTs for PM-eBus Sewa (Tender 2). Details of demand received from the participating States/ UTs is as under:

3. ABOUT CESL

Energy Efficiency Services Limited (EESL) is an Energy Service Company (ESCO), promoted by Ministry of Power, Government of India as a Joint Venture of four reputed public-sector undertakings: NTPC Limited, Power Finance Corporation Limited, REC Limited and Power Grid Corporation of India Limited. EESL works through its wholly owned subsidiary Convergence Energy Services Limited (CESL) on electric mobility. CESL offers interventions that solve multiple gap areas in the energy ecosystem by amalgamating seemingly independent yet complementary sectors such as electricity, transport, home appliances and introducing models for adoption at scale through government partnerships and innovative financing such as carbon markets.

CESL launched a ‘Grand Challenge (GC)’ on 30th September 2021 to aggregate demand from the 9 cities selected for phase-II of the FAME II scheme on an Operational Expenditure (OPEX) basis, i.e., using Gross Cost Contracts (GCC). Under this model, the private service provider invests in the purchase of bus and charging infrastructure along with its operations and maintenance throughout the contract tenure and in return receive a per km (“PK”) fee. The revenue collection would continue to remain with the city. The model has the advantage of enabling the contracting authority to focus on overseeing service delivery, limiting the upfront capital investment by cities and the need to manage staff, and at the same time transferring the technology risk of electric buses to the service providers who are best suited to manage them.

To this end, CESL on behalf of Public Transport Agencies (also referred to as Authorities or State Transport Corporations in this Tender) for the aggregated demand received from Ministry of Housing and Urban Affairs (MoHUA) under PM-eBus Sewa Scheme, is floating the second tender for “Selection of Bus Operator for Procurement, Supply, Operation and Maintenance of 3,132 buses (Tender 2)”.

Buses shall be fully built electric buses of 9m, and 12m length along with allied electrical & civil infrastructure under Gross Cost Contract (GCC) Model in line with Volume 3 (the “Project”).

4. SCOPE OF WORK

4.1 This RfP has been prepared for the deployment of 9m and 12m electric buses on GCC basis, through the PM-eBus Sewa. A Concession Agreement as per the format provided in Volume 2 (“Agreement”) shall be signed between the Selected Bidder and the participating Authority (individual Agreements to be signed with each Authority). The monthly assured kms and period of Concession Agreement
(“Concession Period”) for different types of buses is provided below.

*City wise demand is placed at Annexure B.

12.2 Bidding Conditions:

1. Each State/ UT in Package 1 will have only one Selected Bidder. A Bidder participating for a particular State/ UT in Package 1 may also participate for the same State/ UT in Package 2.

2. The Bidder may participate in the Bid for either one or more States. **However, Bidder must mandatorily submit price bid for all Lot(s) pertaining to a particular State in Package 1 in which it is participating.** The Bidder will be considered disqualified in case a Price Bid is not submitted for any Lot forming part of the State in Package 1 in which the Bidder is participating. It is further clarified that a Bidder participating for a particular state in Package 1 need not mandatorily participate for the same State/ UT in Package 2.

3. The L1 price for each State/UT for Package 1 will be calculated using the weighted average price ("Weighted PK Fees") bid for all lots forming part of the Price Bid for that State/UT.

4. For Package 2, Bids will be evaluated independently for each lot, depending on the INR per km rate quoted by the Bidders.

5. Weighted PK fee for Package 1 is only for determination of Lowest bidder (L1) in a particular State/ UT.

6. To further clarify, payment to the Selected Bidder will be made as per the Quoted rate for each Lot(s)
The maximum number of cumulative Buses that can be allotted to one Bidder in Package 1 will be restricted to 1,700 Buses ("Quantity Restriction"). If the selected bidder is L1 in multiple states and the cumulative number of buses in those States are more than 1,700 then such bidder is eligible to get maximum up to 1,700 buses only. In such cases, L1 bidder will have the right to choose the State(s) of its choice subject to the maximum of cumulative 1,700 buses. However, there will be no Quantity Restriction in Package 2 and any awarded quantity in Package 2 will not be included in Quantity Restriction under Package 1.

12.3 CESL shall appoint Selected Bidder(s) for each State in the following manner:

1. The Financial bids of those Bidders who are found responsive and are qualified in accordance with the terms of this RfP shall be opened and evaluated independently for each lot, depending on the INR per km rate quoted by the Bidders.

2. A list of all such Bidders whose financial bids are opened will be prepared ranking the Lowest Bidder (L1) up to the Highest Bidder (H1) separately for each Package for each State. ("Rank List").

3. The Bidder quoting the Lowest Price (L1 Bidder) shall be considered the “Preferred Bidder” for each State/ UT individually in Package 1 and Package 2.

4. In case a Bidder is L1 for more than 1,700 No. of Buses in Package 1, then CESL shall ask the Preferred Bidder to choose the States in Package 1 in which it wishes to operate.

5. For the remaining States in Package 1, CESL shall call the Second Lowest Bidder (L2) for each State where the L1 Bidder has agreed to forego its allotment due to the Quantity Restriction and request the L2 Bidder to carry out the scope of work as per the RfP at the Lowest Price at which the First Bidder (L1) is considered for award (Price Matching).

6. In case the L2 bidder agrees to match the Lowest Price (L1), it shall be considered the “Second Preferred Bidders” and be eligible for award of the remaining quantity of those States.

7. If Second Lowest Bidder (L2) does not agree to match the price of the First Preferred Bidder (L1) but subsequent lowest bidders (L3/L4/L5 etc.) do agree to match the price of the First Preferred Bidder, they shall be considered the “Second Preferred Bidders”.

8. In case none of bidders agree to match the price of First Preferred Bidder (L1), the entire lot may be recommended to be awarded to L1, at the sole discretion of CESL based on their eligibility criteria as defined in the RfP.

9. CESL, and only CESL, retains right to negotiate with the bidder(s). CESL also does not bind itself to accept the preferred bid before or after the negotiations and it reserves the right to accept or reject any bid, in whole or in part. To be clear, this right is not automatically passed on to States/ Cities participating in this Tender.

10. Upon opening of the Price bids, in case Price quoted by Lowest Bidder in relation to the market rate or its internal estimate or Good Industry Practice is found to be not as per market benchmark, CESL shall be entitled to solicit, at its sole discretion, detailed price analysis for any or all items specified in Price Bid, from the said bidder to demonstrate the internal consistency of those prices.

ANNEXURE E: NOTE ON PROPOSED PAYMENT SECURITY MECHANISM (PSM) SCHEME FOR PM-eBUS SEWA

NOTE ON PROPOSED PAYMENT SECURITY MECHANISM (PSM) SCHEME FOR PM-eBUS SEWA

Introduction
Ministry of Heavy Industries (MHI), GoI is coming up with a new scheme titled “Payment Security Mechanism for electric busses funded by GOI schemes” by facilitating a dedicated Payment Security Fund (PSF). The scheme has two components:

i) Payment Security to the operators/OEMs as per the Concession Agreement signed between Public Transport Authority (PTA)\(^1\) and the operators/OEMs for procurement and operation of e-buses.

ii) Consent of State/UT for Direct Debit Mandate (DDM). This would require a consent from State/UT in a prescribed format.

The detailed mechanism to be followed under the scheme is given below:

1. Event of PSM Triggering
   i. In case of delay/non-payment of bill by PTA within the prescribed time as per concession agreement. The event will lead to “Default by PTA”
   ii. OEM/operator shall report the matter and submit the proposal to the fund manager (CESL).

2. Disbursement from Payment Security Fund (PSF) by CESL
   i. CESL will verify, approve, sanction the proposal, and disburse the funds in the Escrow to the extent of the default.

3. Repayment Mechanism of PSF by PTAs
   i. PTAs must repay the entire amount along with the bank interest\(^2\) within 90 days from the date of disbursement of funds from PSF.
   ii. In addition, Late Payment Surcharge (LPS) @ 3% per annum based on number of days delayed from the date of fund disbursement from PSF, will be applicable to PTA.

4. Invocation of DDM by RBI
   i. If non-repayment by PTA persists beyond 90 days, CESL shall report the matter to the Steering Committee of PSM under MHI to invoke the DDM.
   ii. MHI would invoke DDM based on Committee’s recommendations by informing RBI which would debit the entire amount from the current account of the State/UT Government and will transfer the same to the PSF.

---

\(^1\) Public Transport Authority (PTA) is any government agency which is operating buses in India including State Transport Undertakings (STUs), State Transport Corporations (STCs), Special Purpose Vehicles (SPVs) etc.

\(^2\) The bank interest shall be calculated at the prevailing 3 years SBI’s Marginal Cost of Funds based Lending Rate (MCLR), compounded annually.

In such an event, the Operator shall, as soon as reasonably practical, submit to the Authority the information required pursuant to Clause 12.6.2.

12.6.4 Without prejudice to the Operator’s obligations to notify the Authority regarding the occurrence of a Delay Event above, the Operator shall: (i) keep and maintain records to accurately substantiate and establish claims for extensions under this Clause 12.6; and (ii) give the Authority access to such records and documents or provide the Authority with copies, if so requested.

12.6.5 If there are two or more concurrent causes of delay and only one of those concurrent causes is a cause of delay which would entitle the Operator to an extension of time in accordance with this Clause 12.6, then the Operator shall not be entitled to an extension of time for the period of such concurrency.

12.6.6 The Operator shall not be entitled to any extension of time for any reason whatsoever, including due to:

14.1.5 The Authority Representative shall, pursuant to any inspection conducted under this Clause 14.1, also submit an inspection report for each Bus identifying any minor defects and deficiencies required to be rectified by the Operator in conformity with the Specifications and Standards (the “Punch List”). The Operator shall, no later than 30 (thirty) days from the date on which it receives the Punch List, rectify each item in the Punch List and notify the Authority of the same. The Authority may, in its discretion, inspect the Bus within 7 (seven) days thereof, and in the event that any Punch List items remain un-rectified, the Operator shall pay to the Authority as Damages, an amount of 1% (one per cent) of the Performance Security per bus for each day of delay until all items of the Punch List for the particular bus are rectified.
14.2 **Commercial Operation Date (COD) for Respective Lot of Buses**

14.2.1 The Operator shall within 30 (thirty) days from the date of delivery of each respective Lot of Buses (as mentioned in the Delivery Schedule) comply with the following:

(a) ensure activities related to readiness for Commencement of Services are completed;
(b) appoint duly experienced and trained drivers holding valid driving licenses in accordance with Applicable Law;
(c) deposit copy of the driving licenses of the appointed drivers with the Authority; and
(d) ensure that the Maintenance Depot Completion Certificate has been issued in accordance with Clause 12.5.4 for each Maintenance Depot;
(e) ensure that the Charging Infrastructure required for the charging of such Lot of Buses has been installed and is commissioned and ready to operate in accordance with the requirements of this Agreement; and
(f) procure and install the necessary movable assets such as plant and equipment, materials, consumables, etc. at the Maintenance Depot as required for the Operation and Maintenance of the Buses, the Maintenance Depots and the Charging Infrastructure.

14.2.2 Upon completing the activities enumerated in Clause 14.2.1 above for the each Lot of Buses, the Operator shall intimate in writing to the Authority of its readiness to achieve COD for such Lot of Buses, along with detailed proof of completing each such activity. The Authority shall, within 2 (two) days of receiving such written intimation, inspect the relevant documents and the Maintenance Depot, including the Charging Infrastructure, to determine compliance by the Operator with its obligations in Clause 14.2.1 above. Upon being satisfied that the Operator has duly complied with all the requirements set forth in Clause 14.2.1 above for achieving COD for such Lot of Buses, the Authority shall within a period no longer than 5 (five) days from such inspection, issue to the Operator a Completion Certificate (the “Completion Certificate”) for such Lot of Buses. In the event, any deficiencies or shortcomings are observed by the Authority in relation to the fulfilment by the Operator of its obligations under Clause 14.2.1 for any particular Buses, the Authority shall exclude such Buses from the relevant Lot and shall issue a Completion Certificate with respect to the remaining Buses in the Lot. For the Buses that have been excluded from a particular Lot, the Authority shall issue a notice to the Operator within 2 (two) days of such inspection highlighting the deficiencies or shortcomings. The Operator shall rectify/remove the deficiencies within such period as specified by the Authority and the Authority shall, upon being satisfied that the deficiencies identified by it have been rectified, forthwith issue the Completion Certificate for such Buses. Provided however, that if the deficiencies or shortcomings observed by the Authority are minor in nature and can be rectified in the usual course of performing Operations and Maintenance of the Buses, the Authority shall not withhold the Completion Certificate for such Lot of Buses. Provided further that the issuance of the Completion Certificate in such cases does not, in any manner, affect the Operator’s obligation to rectifying any deficiencies or shortcomings identified by the Authority.
14.2.3 The date of issuance of the Completion Certificate for a particular Lot of Buses shall be reckoned as the “Lot Commercial Operation Date” or “Lot COD” under this Agreement. The date when the Completion Certificate is issued for all Lots of Buses required to be introduced into service by the Operator, shall be the Commercial Operation Date (“COD”) under this Agreement whereupon the Project enters into commercial service, provided, however, that the entry of any Buses into commercial service shall always be subject to compliance with the provisions of Clause 18.3. After a Lot COD, the Operator shall ensure Commencement of Service of the Buses in such Lot in accordance with the Deployment Plan.

14.2.4 In the event, the Authority fails to issue the Completion Certificate and the notice for deficiency in respect of Buses for which Completion Certificate is withheld under Clause 14.2.2, then the COD for the said Lot of Buses will be deemed (“Deemed Lot COD’) to have been achieved on the 7th day after receipt of the notice of the Operator towards readiness for operations for the concerned Lot of Buses.

14.3 Damages for delay

If COD does not occur prior to the 91st (ninety first) day after the Scheduled Maintenance Depot Completion Date for the last Maintenance Depot handed over by the Authority pursuant to Clause 10.2.5, as the same may be extended in accordance with the terms of this Agreement (such date, the “Scheduled COD”), for reasons not directly attributable to a Delay Event, the Operator shall pay Damages to the Authority calculated at the rate of 0.1% (zero point one per cent) of the amount of Performance Security per bus times the number of buses allocated to the specific depot for each day of delay until COD is achieved. Provided however, if the Operator is unable to achieve COD on account of a Delay Event, then the Operator shall be entitled to a day-for-day extension of the Scheduled COD if and only to the extent that COD is, or will be, delayed due to a Delay Event. In this context, the provisions of Clause 12.6 shall apply to any extension of the Scheduled COD that is sought by the Operator.
ARTICLE-15 : CHANGE OF SCOPE

15.1 Change of Scope

15.1.1 The Authority may, notwithstanding anything to the contrary contained in this Agreement, require the provision of upgraded technology or additional works and services in the Buses or at the Maintenance Depots, which are not included in the Scope of the Agreement (the “Change of Scope”). Any such Change of Scope shall be made in accordance with the provisions of this Article 15 and the costs thereof shall be expended by the Operator and reimbursed to it by the Authority in accordance with this Article 15.

(b) the options for implementing the proposed Change of Scope and the effect, if any, each such option would have on the costs and time thereof, including a detailed breakdown by work classifications specifying the material and labour costs calculated in accordance with Good Industry Practice.

15.2.3 Upon receipt of information set forth in Clause 15.2.2, if the Authority decides to proceed with the Change of Scope, it shall convey its preferred option to the Operator, and the Parties shall thereupon make good faith efforts to agree upon the time and costs for implementation thereof. Upon reaching an agreement, the Authority shall issue an order (the “Change of Scope Order”) requiring the Operator to proceed with the performance thereof. In the event that the Parties are unable to agree, the Authority may, by issuing a Change of Scope Order, require the Operator to proceed with the performance thereof pending resolution of the Dispute in accordance with the Dispute Resolution Procedure.
15.2.4 The provisions of this Agreement, insofar as they relate to Tests, shall apply mutatis mutandis to any modifications in the Buses undertaken by the Operator under this Article 15.

15.3 Payment for Change of Scope

To the extent that the work under the Change of Scope Order is not completed within a period of 180 days from the date of the Change of Scope Order, the Operator shall procure an extension of the validity of the bank guarantee.

15.3.2 The Operator shall, after commencement of work, present to the Authority bills for payment in respect of the works and services in progress or completed works and services, as the case may be, supported by such Documentation as is reasonably sufficient for the Authority to determine the accuracy thereof. Within 30 (thirty) days of receipt of such bills, the Authority shall disburse to the Operator such amounts and after making a proportionate deduction for the advance payment made hereunder. In the event of any Dispute, final adjustments thereto shall be made under and in accordance with the Dispute Resolution Procedure.

15.3.3 Notwithstanding anything to the contrary contained in Clause 15.3.1 and 15.3.2, all costs arising out of any Change of Scope Order, other than those agreed as a part of the Change of Scope Order, shall be borne by the Operator.

15.4 Restrictions on certain works

15.4.1 Notwithstanding anything to the contrary contained in this Article 15, the Authority shall not require the Operator to undertake any works or services if such works or services are likely to delay the procurement and deployment of the Buses in accordance with the requirements of this Agreement; provided that in the event that the Authority considers such works or services to be essential, it may issue a Change of Scope Order, subject to the condition that the works forming part of or affected by such Change of Scope Order shall not be taken into account for purposes of determining completion of the Maintenance Depot.

15.4.2 Notwithstanding anything to the contrary contained in this Article 15, the cumulative costs relating to all Change of Scope Orders for provision of works and services shall not exceed 5% (five percent) of the Total Project Cost during the Contract Period.

15.4.3 Notwithstanding anything to the contrary, unless the Parties agree otherwise, the Authority shall not require the Operator to undertake any Change of Scope which involves upgradation of batteries used in the Buses due to technological advancements in battery chemistry.

Notwithstanding anything to the contrary, the Authority agrees that any revised Operational Route shall only have an origin, final destination and opportunity charging location at one of the Maintenance Depots or an Opportunity Charging Station allocated to the Operator as per Schedule-A. The Operator shall only ply Buses on the Operational Routes, unless directed otherwise by the Authority. For the avoidance of doubt, it is clarified that the Authority may amend the Operational Routes by providing at least 5 (five) days prior notice to the Operator under and in accordance with the provisions of this Agreement. The Operator shall provide the Authority access to the raw feed of the ITS. The Operator shall install the ITS to provide the data as per the data standards and communication protocols specified in Schedule - P. The Operator shall ensure integration of the data feed from ITS devices to the Centralized ITMS Platform. The Operator agrees that a failure to comply with its obligations under this Clause 19.7 shall be deemed to be an Operator Default.
ARTICLE-20 : KEY PERFORMANCE INDICATORS

20.1 Key Performance Indicators

Without prejudice to the obligations specified in this Agreement, the Operator shall operate and maintain every Bus such that it achieves the performance indicators comprising Reliability, Operational Availability, Start Punctuality, Arrival Punctuality, Trip Speed, Frequency, Safety and Infractions as specified in this Article 20, (the “Key Performance Indicators”).

20.2 Reliability

20.2.1 The Parties agree that the average reliability of all Buses in the fleet shall be measured on a monthly basis in terms of the number of Breakdowns per 10,000 (ten thousand) kilometres travelled by the Buses (the “Breakdown Factor”)

20.2.2 Breakdown Factor shall be equal to the quotient of the aggregate number of Breakdowns of all Buses multiplied by 10,000 (ten thousand) and divided by the cumulative distance travelled by all Buses in that month.

Breakdown Factor (BF) = \( \frac{\text{total no. of Breakdowns of all buses in a month} \times 10,000}{\text{Total bus kms operated in a month}} \)

20.2.3 The Operator agrees that the Breakdown Factor for the Buses, determined in accordance with Clause 20.2.2, shall be equal to or less than 0.5 (zero decimal five). The Operator agrees that for every increase in the Breakdown Factor by 0.1 (zero decimal one) above 0.5, it shall pay Damages to the Authority at the rate of 0.1% (zero decimal one) of the Monthly Fees.

20.2.4 The Authority agrees that if the Breakdown Factor is less than 0.5 (zero decimal five), then for every 0.1 (zero decimal one) decrease in the Breakdown Factor below a factor of 0.5, the Authority shall pay to the Operator an incentive equal to 0.05% of the Monthly Fees.

20.3 Operational Availability

20.3.1 After Lot COD of each Lot as per the Delivery Schedule, a Bus shall be deemed to be available for operation at all times, save and except for the instances set out in Clause 20.3.2 below.

20.3.2 The Parties agree that the period for which a Bus is deemed to be not available for operation shall be as follows:

a) Bus is not available at the scheduled start of shift(s) turnout time as per the Deployment plan.
b) Bus held up at Maintenance Depot/ workshop for any reason during shift(s) schedule turnout time unless such non availability is on account of reason not directly attributable to Operator such as Bus damaged due to riots, natural calamities, vandalism, traffic jams.
20.3.3 The availability of the Buses shall be calculated on a shift(s) basis by dividing the number of Buses available for operations in the start of shift(s) as per the scheduled turn out time (as per Clause 20.3.1 and 20.3.2 above) by the total number of Buses contracted by the Authority under this Agreement multiplied by 100 (one hundred” (“Availability”).

\[
\text{Availability} = \frac{\text{Total no. of buses available for operations in the start of shift(s)}}{\text{Total number of buses as per plan}} \times 100
\]

20.3.4 The Operator shall at all times ensure that the Availability of the Buses during each month of the Contract Period is equal to 100” (“Guaranteed Availability”). To ensure this availability:

- operator should maintain minimum 5% spare buses (“Additional Buses”) from the date of Lot COD for each lot as per the Delivery schedule.
- Authority should provide additional space for these Additional Buses.

20.3.5 Notwithstanding anything to the contrary contained in this Agreement, upon the occurrence of any of the events mentioned in Clause 17.12, the Buses affected by such events will be deemed to be Available for the duration of the event.

20.3.6 The Operator agrees that for any reduction in the Availability as compared to the Guaranteed Availability, it shall pay Damages to the Authority as per the table below: The Damages payable by the Operator for a failure to meet the Guaranteed Availability shall be payable monthly.

20.3.7 The Operator shall make the Buses available at the prescribed locations mentioned in the Deployment Plan along with driver about 15 minutes before the scheduled turn out operation on all days.

20.3.8 Operator shall ensure refurbishment of Buses after 6 years from the date of COD. Refurbishment of buses shall be such that Buses are in best conditions with completion of all missing components, proper working of major aggregates/ assemblies/ sub-assemblies, replacement of damaged body panels, replacement of cushions of passenger seats, flooring, structural members etc. the refurbishment of buses is required to be completed within window of 1 year i.e., before competition of seventh year from the date of COD. During the refurbishment period relaxation in Guaranteed Availability up to 5% (five percent) is allowed. The technical team will inspect the buses before they are put in services after refurbishment of the Bus, if the bus is found not refurbished in near to showroom condition, such Bus will not be permitted for the operations.
20.4 Punctuality

20.4.1 The starting time punctuality of the Buses shall be measured on a monthly basis in terms of the percentage of on-time start of trips (in accordance with the Deployment Plan) to the total number of trips operated on a daily basis in the relevant month ("Start Punctuality"). The total number of trips where a Bus started late (or did not start) during the month compared to the start time as set out in the Deployment Plan will be recorded and subtracted from the total number of trips operated in such month to arrive at the number of trips operated that started on-time as per the Deployment Plan.

20.4.2 The Operator agrees that the arrival punctuality of the Buses at the end destination of the relevant Operational Route shall be measured on a monthly basis in terms of the percentage of trips with on-time arrival at the final destination (in accordance with the Deployment Plan) to the total number of trips operated on a daily basis in such month ("Arrival Punctuality"). The total number of trips where a Bus arrives late at the final destination during the month will be recorded and subtracted from the number of trips operated in such month to arrive at the on-time arrival trips.

20.4.3 With respect to the Start Punctuality, the Parties agree that the Operator may exercise a relaxation up to 5 (five) minutes for the start time of the Bus schedule as set out in the Deployment Plan. With respect to the Arrival Punctuality, the Parties agree that the Operator may exercise a relaxation up to 10% (ten percent) of the total scheduled trip time as set out in the Deployment Plan (subject to a maximum of 15 (fifteen) minutes).

20.4.4 Subject to the provisions of Clause 20.4.3, the Operator agrees that the Start Punctuality determined in accordance with Clause 20.4.2 shall be equal to or more than 90% (ninety percent) in any month ("Guaranteed Start Punctuality") and the Arrival Punctuality shall be equal to or more than 80% (eighty percent) in any month ("Guaranteed Arrival Punctuality") respectively.

20.4.5 The Operator agrees that for every 1% reduction in the Start Punctuality or the Arrival Punctuality in any month, as the case may be, as compared to the Guaranteed Start Punctuality or the Guaranteed Arrival Punctuality, in each case, for that month, it shall pay Damages to the Authority at the rate of 2% of the Monthly Fees. The Damages payable by the Operator for a failure to achieve the Guaranteed Start Punctuality or the Guaranteed Arrival Punctuality shall be calculated at the end of each month. Provided however, if, based on a verification of the Start Punctuality or the Arrival Punctuality in any month, the Authority determines that the Operator has failed to achieve the Guaranteed Arrival Punctuality directly as a result of a failure to achieve the Guaranteed Start Punctuality, then in order to avoid any double counting of the Damages payable by the Operator, the Authority shall only levy Damages for a failure to achieve one of such Key Performance Indicators.

20.4.6 The Authority agrees that if, in any month, the Start Punctuality or the Arrival Punctuality is more than the Guaranteed Start Punctuality or the Guaranteed Arrival Punctuality for that month respectively, then for every 1% increase in the Start Punctuality or the Arrival Punctuality over and above the Guaranteed Start Punctuality or the Guaranteed Arrival Punctuality, as the case may be, for that month, the Authority shall pay to the Operator an incentive equal to 0.05% of the Monthly Fees. The incentive (if any) payable by the Authority to the Operator in accordance with this Clause 20.4.6 shall be calculated at the end of each month.
20.5 Frequency

20.5.1 The frequency of operation of all available Buses (as determined in accordance with Clause 20.3 above) shall be measured on a monthly basis in terms of:

(a) a percentage of the cumulative completed trips travelled by all Buses to the aggregate number of scheduled trips for the same time period (“Trip Frequency”); and

(b) a percentage of the cumulative Bus Kilometres travelled by all Buses to the aggregate scheduled Bus Kilometres for the same time period (“Bus Kms Frequency”).

20.5.2 The Operator agrees that the guaranteed Trip Frequency (“Guaranteed Trip Frequency”) and the guaranteed Bus Kms Frequency (“Guaranteed Bus Kms Frequency”), as the case may be, determined in accordance with Clause 20.5.1 shall be equal to or more than 94% (ninety four percent).

20.5.3 Unless otherwise set out in the Deployment Plan, the Authority shall provide minimum of [5] hours for every bus, at depot during each night, for charging, maintenance and any other activities.

20.5.4 The Buses in each direction shall be operated by the Operator in line with the Deployment plan provided by the Authority.

20.5.5 The Operator agrees that for every 1% reduction in the Trip Frequency or the Bus Kms Frequency, as the case may be, as compared to the Guaranteed Trip Frequency or the Guaranteed Bus Kms Frequency, it shall pay Damages to the Authority at the rate of 2% of the Monthly Fees. The Damages payable by the Operator for a failure to achieve the Guaranteed Trip Frequency or the Guaranteed Bus Kms Frequency shall be calculated at the end of each month. Provided however, if, based on a verification of the Trip Frequency or Bus Kms Frequency, the Authority determines that the Operator has failed to achieve the Guaranteed Trip Frequency directly as a result of a failure to achieve the Guaranteed Bus Kms Frequency, or vice-versa, then in order to avoid any double counting of the Damages payable by the Operator, the Authority shall only levy Damages for a failure to achieve one of such Key Performance Indicators, as the case may be.

20.5.6 The Authority agrees that if, in any month, the Trip Frequency or the Bus Kms Frequency is more than the Guaranteed Trip Frequency or the Guaranteed Bus Kms Frequency, respectively, then for every 1% increase in the Trip Frequency or the Bus Kms Frequency over and above the Guaranteed Trip Frequency or the Guaranteed Bus Kms Frequency, as the case may be, the Authority shall pay to the Operator an incentive equal to 0.05% of the Monthly Fees.
20.6 Safety of Operations

20.6.1 The Parties agree that the safety of the Buses in the fleet shall be measured in terms of the number of accidents per 10,000 Kms (Ten thousand kilometers) (the “General Safety”) and the number of severe accidents per month (the “Severe Safety”), respectively.

20.6.2 The General Safety shall be calculated in terms of Minor Accident Factor.

\[
\text{Minor Accident Factor} = \frac{\text{No of minor accidents in a month} \times 10,000}{\text{Total Bus kms in a month}}
\]

The Severe safety shall be calculated in terms of number of Major Accidents.

20.6.3 The Operator agrees that the assured General Safety (“Assured General Safety”) determined in accordance with Clause 20.6.1 and 20.6.2 shall be equal to or less than 0.01 (zero decimal zero one).

20.6.4 The Operator agrees that for every increase in number of accidents, by a factor of 0.01 (zero decimal zero one) as compared to the Assured General Safety, it shall pay Damages to the Authority at the rate of 2% of the Monthly Fees. The Operator agrees that for every number of Severe Safety incident occurrence, it shall pay Damages to the Authority at the rate of 2% of the Monthly Fees for each incident.

20.6.5 The Authority agrees that if the General Safety is less than 0.005 (zero decimal zero zero five), then for every 0.001 decrease in the General Safety the Authority shall pay to the Operator an incentive equal to 0.05% of the Monthly Fees.

20.6.6 Event of serious incidents such as Bus catching fire for more than 4% (four Percent) of the lot within a period of 3 (three) months, in such situations Authority may direct Operator to take all Buses off road of that lot and ask the Operator to identify and rectify the cause. Operator may even be asked to check the complete fleet and subjected to thorough inspection by the Authority. No Monthly Assured Bus Kilometre payment will be applicable for non-operation of Buses during such period.

20.7 Operational Infractions

20.7.1 The Operator shall Operate and Maintain the Buses so as to minimize the occurrence of any of the Operational Infractions. An Operational Infraction may be identified by the Authority (or the Authority's Representative) either through inspections of the Buses and Maintenance Depots, User complaints or review of the data generated from the ITS.

20.7.2 The Operator agrees that upon the occurrence of any Operational Infraction, it shall pay to the Authority Damages of an amount corresponding to the breach of such Operational Infraction as set out in Schedule-T. In the event of any repeated Operational Infractions, the rate of Damages payable by the Operator shall increase in accordance with the provisions of Schedule-T.
20.8 Monthly Report

20.8.1 The Operator shall, no later than 7 (seven) days after the end of each month, furnish to the Authority a report (as per the format in schedule X) containing details of the compliance with the Key Performance Indicators of each Bus as measured on a daily basis. The Operator shall promptly give such other relevant information as may be required by the Authority for the purposes of determining whether the Operator is achieving the Key Performance Indicators as set out in this Article 20.

20.8.2 The Operator shall keep backup for at least 90 days of raw data and proper records of all data collected from the operation of the Buses from the Data Monitoring System, ITMS or any other systems installed, for the purposes of verification by the Authority.

20.9 Passenger Charter

The Operator shall implement a charter articulating the rights and expectations of Users (the "Passenger Charter") as provided by the Authority. The Operator shall at all times be accountable and liable to Users in accordance with the provisions of the Passenger Charter and Applicable Laws.

The Operator shall ensure and procure compliance of each of the Key Performance Indicators specified in Article 20. Any Damages payable by the Operator for a failure to achieve the Key Performance Indicators set out in Clauses 20.2 to 20.7 in any month in accordance with this Article 20 shall be capped at 10% of the aggregate Monthly Fees payable in such month. Any Damages payable by the Operator as a result of any Operational Infractions in any month shall be capped at 5% of the Monthly Fees for that month.

20.11 Cap on incentives for exceeding to achieve Key Performance Indicators

Any incentives payable by the Authority to the Operator for exceeding the prescribed Key Performance Indicators in accordance with this Article 20 and rates specified in Schedule U in any month shall be capped at 5% of the aggregate Monthly Fees for the respective Month.

20.12 Initial Operating Period

During the first 30 (thirty) days of Operations after the first Lot COD as per the Delivery Schedule, the Authority shall provide allowance of up to 25% of the respective Key Performance Indicators to the Operator except safety of operations as per Clause 20.6.

22.1.2 Subject to Clause 22.4 and Clause 22.5 below, the Fee payable to the Operator under this Agreement shall be the calculated in the following manner:

a) If the actual Bus Kilometers travelled by all Buses is equal to aggregated Monthly Assured Kilometers, then Fee shall be calculated by multiplying the PK Fee (INR [●]) with such actual Bus Kilometers

b) If the actual Bus Kilometers travelled by all Buses is less than the aggregated Monthly Assured Kilometers, then Fee shall be calculated, in accordance with clause 22.3.2 by using the following formula:

\[ \text{Fee} = (PK\ Fee \times \text{actual Bus Kilometers}) + (PK\ Fee \times 75\% \times (\text{Monthly Assured Kilometers} - \text{actual Bus Kilometers})) \]

c) If the actual Bus Kilometers travelled by all Buses is more than the aggregated Monthly Assured Kilometers, then Fee shall be calculated, in accordance with clause 22.3.3 by using the following formula:

\[ \text{Fee} = (PK\ Fee \times \text{Monthly Assured Kilometers}) + (PK\ Fee \times 50\% \times (\text{actual Bus Kilometers} - \text{Monthly Assured Kilometers})) \]

For the avoidance of doubt, it is clarified that the Fee, as per the above methodology shall be calculated on a monthly basis.

22.1.3 The Parties agree that a Bus Kilometer shall comprise of the kilometers travelled by a Bus in respect of:

(a) distance travelled by a Bus assigned on a particular Operational Route as per the Deployment Plan;
(b) distance travelled by a Bus from the Maintenance Depot to the first point of loading passengers at the commencement of its service on a day

22.1.4 The Operator agrees and acknowledges that a Bus Kilometer, for the purpose of payment of the Fee, shall not include any kilometer travelled by the Bus to any maintenance facilities, other than the Maintenance Depot, or for any travel not authorized by the Authority or not captured in the ITMS platform or otherwise not in accordance with the terms of this Agreement.
22.1.5 For each month after the Lot COD of the first Lot of Buses, the Operator shall compute and provide to the Authority, the total number of Bus Kilometers that all the Buses deployed by the Operator in such month have travelled for the period being reckoned for the purpose of raising the invoice. The Bus Kilometers will be calculated on the basis of route survey done jointly by the Authority and the Operator for the pre-determined routes before the start of operations. The payment against these Bus Kilometers will be subject to complete schedule adherence as verified through ITS.

22.1.6 In the event Bus Kilometers is not captured by ITMS on account of default of authority, the odometer reading of such fleet for the performed trips shall be referred for calculation of Bus Kilometer.

22.1.7 The Authority shall deposit the Fee due and payable to the Operator subject to and in accordance with this Article 22, into the Escrow Account.

\]

Where,
CPI\text{Base} = \text{Index value issued by Government of India's Labour Bureau's Consumer Price Index for Industrial Workers (CPI-IW) at the time of Bid end date.}

CPI\text{Month} = \text{Index value issued by Government of India's Labour Bureau's Consumer Price Index for Industrial Workers (CPI-IW) for particular month when the price variation is applicable.}

MW\text{Base} = \text{Minimum wages notified by the Labour department of that state applicable at the time of bid end date for skilled category}

MW\text{Month} = \text{Minimum wages for skilled category for particular month, notified by the Labour department of that state}

\[\text{Allowed Energy Consumption} = (1.3 \text{ kWh/km} \times \text{Actual Bus Kms operated in a year for 12m Buses}) + (1.0 \text{ kWh/km} \times \text{Actual Bus Kms operated in a year for 9m Buses}) + (0.8 \text{ kWh/km} \times \text{Actual Bus Kms operated in a year for 7m Buses})\]

To further clarify, the Allowed Energy Consumption will be calculated for only the type(s) of Buses which are deployed with the Authority.

Termination Notice and grant 15 (fifteen) days to the Authority to make a representation, and may after the expiry of such 15 (fifteen) days, whether or not it is in receipt of such representation, issue the Termination Notice.

32.3 Termination Payment

32.3.1 Upon Termination on account of an Operator Default after COD, the Authority shall pay to the Operator, by way of Termination Payment, an amount equal to:

(a) 90% (ninety per cent) of the Debt Due less Insurance Cover; and

(b) 70% (seventy per cent) of the amount representing the Additional Termination Payment.

Provided that if any insurance claims forming part of the Insurance Cover are not admitted and paid, then 80% (eighty per cent) of such unpaid claims shall be included in the computation of Debt Due.

Provided further that, in computing the Termination Payment due to the Operator, the Authority shall deduct an amount equal to any Subsidy and Government Fiscal Assistance received by the Operator from the Program Manager and/or the Authority. Further, upon Termination on account of an Operator Default prior to the Lot COD of the first Lot of Buses, the Authority shall have the right to take over the Fit Out Works in progress in which case it shall pay to the Operator an amount equal to the actual capital cost of the Fit Out Works completed by the Operator up until the date of Termination as verified.

(a) Debt Due;

(b) 150% (one hundred and fifty per cent) of the Adjusted Equity; and

For the avoidance of doubt,
it is expressly agreed that Termination Payment shall constitute full discharge by the Authority of its payment obligations in respect thereof hereunder.

32.3.4 Upon Termination on expiry of the Contract Period by efflux of time, no Termination Payment shall be due and payable to the Operator; provided that in the event any Project Assets shall have been acquired and installed after the 5th (fifth) anniversary of the COD, with prior written consent of the Authority, which consent shall not be unreasonably denied, a Termination Payment equal to 80% (eighty percent) of the Adjusted Depreciated Value of such assets and equipment shall be deemed to be Debt Due for the purposes of Termination Payment. Provided that, any Project Assets acquired by the Operator without the prior written consent of the Authority shall not be taken into account when calculating the Termination Payment under this Clause 32.3.4 and such Project Assets shall remain the property of the Operator after Termination and the Operator may dispose of such Project Assets as it deems fit.

32.3.5 The Operator expressly agrees that Termination Payment under this Article 32 shall constitute a full and final settlement of all claims of the Operator on account of Termination of this Agreement for any reason whatsoever and that the Operator or any shareholder thereof shall not have any further right or claim under any law, treaty, convention, contract or otherwise.

32.4 Certain limitations on Termination Payment

32.4.1 Termination Payment, not being Additional Termination Payment, due and payable under this Agreement shall be limited to the Debt Due and Adjusted Equity, as the case may be, which form part of the Total Project Cost in accordance with the provisions of this Agreement; provided that the amount payable in respect of any Debt Due expressed in foreign currency shall be computed at the Reference Exchange Rate for conversion into the relevant foreign currency as on the date of Termination Payment. For the avoidance of doubt, it is agreed that within a period of 60 (sixty) days from COD, the Operator shall notify to the Authority, the Total Project Cost as on COD and its disaggregation between Debt Due and Equity, and only the amounts so conveyed shall form the basis of computing Termination Payment, and it is further agreed that in the event such disaggregation is not notified to the Authority, Equity shall be deemed to be the amount arrived at by subtracting Debt Due from Total Project Cost. The Parties also agree that for the purposes of computing Termination Payment, the Debt Due shall at no time exceed 70% (seventy per cent) of the Total Project Cost.

32.4.2 The Operator may only construct, acquire or install any Specified Assets after the 5th (fifth) anniversary of COD, but before the 10th (tenth) anniversary thereof (and excluding land), with the prior written consent of the Authority and which consent shall not be unreasonably withheld by the Authority. Provided that, any Project Assets constructed, acquired or installed by the Operator without the prior written consent of the Authority shall not be taken into account when calculating any “Additional Termination Payment” due to the Operator under this Article 32 and such Project Assets shall remain the property of the Operator after Termination and the Operator may dispose of such Project Assets as it deems fit.

37.4.1 The Indemnified Party shall have the right, but not the obligation, to contest, defend and litigate any claim, action, suit or proceeding by any third party alleged or asserted against such Party in respect of, resulting from, related to or arising out of any matter for which it is entitled to be indemnified hereunder, and reasonable costs and expenses thereof shall be reimbursed by the Indemnifying Party. If the Indemnifying Party acknowledges in writing its obligation to indemnify the Indemnified Party in respect of loss to the full extent provided by this Article 37, the Indemnifying Party shall be entitled, at its option, to assume and control the defence of such claim, action, suit or proceeding, liabilities, payments and obligations at its expense and through the counsel of its choice; provided it gives prompt notice of its intention to do so to the Indemnified Party and reimburses the Indemnified Party for the reasonable cost and expenses incurred by the Indemnifying Party prior to the assumption by the Indemnifying Party of such defence. The Indemnifying Party shall not be entitled to settle or compromise any claim, demand, action, suit or proceeding without the prior written consent of the Indemnified Party, unless the Indemnifying Party provides such security to the Indemnified Party as shall
be reasonably required by the Indemnified Party to secure the loss to be indemnified hereunder to the extent so compromised or settled.

37.4.2 If the Indemnifying Party has exercised its rights under Clause 37.3, the Indemnified Party shall not be entitled to settle or compromise any claim, action, suit or proceeding without the prior written consent of the Indemnifying Party (which consent shall not be unreasonably withheld or delayed).

(c) the Indemnifying Party shall not, in fact, have employed independent counsel reasonably satisfactory to the Indemnified Party, to assume the defence of such action and shall have been so notified by the Indemnified Party; or

(d) the Indemnified Party shall have reasonably concluded and specifically notified the Indemnifying Party either:

(i) that there may be specific defences available to it which are different from or additional to those available to the Indemnifying Party; or

(ii) that such claim, action, suit or proceeding involves or could have a material adverse effect upon it beyond the scope of this Agreement:

Provided that if Sub-clauses (b), (c) or (d) of this Clause 37.4.3 shall be applicable, the counsel for the Indemnified Party shall have the right to direct the defence of such claim, demand, action, suit or proceeding on behalf of the Indemnified Party, and the reasonable fees and disbursements of such counsel shall constitute legal or other expenses hereunder.

Annex - 3

List of parameters and data standard

The bidder shall share vehicle health monitoring and diagnostics (VHMD) parameters through the bus CAN data on a real time basis with the Central ITMS. The list of CAN data parameters shall be shared over and above the vehicle location data through the on-board telematics system.

Electric bus (eBus) performance and safety are directly linked with the battery performance. The usage of eBus battery under sub-optimal conditions can directly influence the performance as well as life of the battery. Analysis of the impact of different stress factors (Battery temperature, C-rate, DOD, and SOC) on the battery can help in getting more insights into the degradation mechanism and battery aging (i.e. Calendar and Cyclic aging). Monitoring and analysis of some of the battery parameters during eBus operation is important to ensure optimal battery life and eBus performance along with a high level of safety. As the Battery Management System (BMS) of the eBus battery monitors all the critical parameters of the battery during eBus operation, the availability of these data with the Authority will help in better planning of eBus operation and charging strategies and ensure safety of operations.

The following CAN parameters should be integrated to the on board IoT device/ITS and capable of transmitting data at a frequency of 30 sec (which may be changed based on requirement of the Centralized ITMS platform) to the centralized ITMS server.

1.2 Applicability

In case of Termination of the Concession Agreement after COD and before the end of the Concession Agreement period, the OEM agrees to provide annual maintenance services for the Buses till the end of the original end date of the Concession Agreement period.

This Agreement is mutually exclusive with the Product Warranty Undertaking executed by the OEM for the purpose of executing the Concession Agreement by either the OEM or its Associate and it will become applicable only in the case of Termination of Concession Agreement.

1.3 Responsibility of the OEM

The OEM agrees to maintain Buses in operational condition till the end of the original period as per the Concession Agreement. Further, OEM undertakes to supply and/or replace any consumables which may be required as per the Maintenance Schedule under the Concession Agreement.

The OEM will also ensure replacement of battery, motor or any other mechanical and electrical part of the Bus which is defected or has reached the end of its useful life.

2. CONSIDERATION

2.1 Amount of consideration

For providing the Annual Maintenance services by OEM, the Authority hereby undertakes to pay the OEM at the predefined rate of 5% of the applicable PK Fees (at the time of Termination) against the Actual Bus Kilometers (“Monthly AMC Fees”) as per the Concession Agreement on a monthly basis till the end of the original contract period. For the purpose of calculating the Monthly AMC Fees, the PK Fees will be revised in accordance with the provisions of this Agreement.

Further, notwithstanding anything to the contrary contained under this Agreement or the Concession Agreement, the OEM agrees to replace battery when SoH falls below 80%.

3. DAMAGES PAYABLE

3.1 Key Performance Indicators (KPIs)

Article 20.2, 20.3 and 20.6 reflecting the Key Performance Indicators (KPIs) related to Reliability, Availability and Safety respectively, as per the Concession Agreement should not be affected due to failure of OEMs to ensure regular maintenance of Buses. In case such KPIs are not met by the
Buses after termination due to the reasons attributable to the OEM then in such case the OEM shall be liable to damages as per the following table:

The bidder shall provide quarterly reports on the SoH of battery packs of each bus. This will be measured at the charger level or by a certified Ammeter by the energy (measured Ah) uptake of the battery packs while charging from 25% to 100% SoC. The relative deterioration of energy uptake of the battery packs will be used to determine the SoH of the battery to be calculated at energy uptake in quarter (kWh)/ energy uptake in first quarter post COD.

XI. Manufacturers need to meet high safety standards for battery packs. These standards include a protection level that is no less than IP67—which represents a high water and dustproof battery pack—and satisfactory operation safety in extreme temperatures ranging from 0 to 65°C.

XII. Bidder to submit the CMVR type approval certificate for the allocated bus at the time of final inspection of the Buses to the respective cities.

XIII. Operator to ensure refurbishment of vehicle after 6 years from the date of commercial operation date (COD). Refurbishment of buses to be in best conditions with completion of all missing components, proper working of major aggregates/ assemblies/ sub-assemblies, replacement of damaged body panels, replacement of cushions of passenger seats, flooring, structural members etc. the refurbishment of buses is required to be completed within window of 1 year i.e., before competition of seventh year from the date of COD. During the refurbishment period, curtail of operations schedule by 5% is allowed. The technical team will inspect the buses before put in services after refurbishment of the bus, if the bus is found not refurbished in near to showroom condition, such Bus will not be permitted for the operations.

The system shall achieve
minimum 95% counting accuracy. The system should be integrated through ITS to the backend of the System(s) of the Authority. The cost of such integration shall be the responsibility of the Bidder during the Contract Period.

XV. Camera Based Passenger Counting System should generate Total Passenger Report- A basic report to analyze passenger counts on a single vehicle only. Time resolution shall be by day, week, month or year. Option to select a range of dates shall also be available; default time interval shall be by day with maximum 90-day resolution allowed. Report output shall be displayed on screen as tabular, chart or both. Export feature shall be of the tabular output only, downloadable as a CSV file.

XVI. Integration to Existing ITMS/AFC System: Bidder shall provide the complete ITS system as specified herein above in the Buses. Scope related to the NCMC based Ticket Validator and AFCS is not in scope of the Operator. However, the Operator needs to provide necessary AC/DC power arrangement for the NCMC based Ticket Validator near the gates of the buses as per the best industry practices. The bidder shall also ensure to supply equipment compatible with existing ITS System of Authority so as to enable smooth integration. Bidder is responsible for regular maintenance ITS equipment installed by throughout the Contract Period. The Contractor and Authority agree to share interfacing protocols and Active Programming Interface with each other for smooth integration of the ITS equipment provided by Bidder to the Authority’s ITMS. The Authority can mount any equipment in the Buses provided by the Bidder at its own cost and the Bidder shall be responsible for the safety and security of such equipment during the Contract Period.

1. Introduction

Protocol Proposed - MQTT

MQTT is a standards-based messaging protocol, or set of rules, used for machine-to-machine communication. The MQTT broker is responsible for maintaining stable connections with clients, processing messages, and forwarding them to the subscribed and approved MQTT packet usually responds to an MQTT command. The MQTT protocol defines two types of network entities: a message broker and several clients. An MQTT broker is a server that receives all messages from the clients and then routes the messages to the appropriate destination clients. An MQTT client is any device (from a microcontroller to a fully-fledged server) running an MQTT library and connecting to an MQTT broker over a network.

MQTT is a lightweight protocol that is used globally while communicating with the IOT Devices. Features of MQTT –

- Lightweight Protocol
- Low bandwidth consumption
- Low power Consumption
- Data agnostic
- Used where M2M communication is required
- Based on Pub/Sub Architecture
- works best where the connection with the devices is not stable

2. MQTT Packet format

Message Format - JSON

JSON, which stands for “JavaScript Object Notation,” is a lightweight data interchange format that is easy for humans to read and write and easy for machines to parse and generate. JSON has become a widely adopted standard for data exchange in various programming languages and is commonly used in web development, APIs, and data storage.

JSON is commonly used for configuration files, data interchange between web servers and clients (e.g., RESTful APIs), and data storage (NoSQL databases often use JSON-like formats). It is also widely used in JavaScript, but its simplicity and versatility have led to its adoption in many programming languages through libraries and APIs, making it a popular choice for data serialization and transmission in modern software development.

At its core, MQTT is a binary-based protocol that utilizes a command and command-acknowledgement format. Moreover, an acknowledgment in the form of an MQTT packet usually responds to an MQTT command.

JSON (JavaScript Object Notation) is commonly used in embedded programming for several reasons:

- Human-readable
- Lightweight
- Standardization
- Ease of parsing
- Data serialization
- Compatibility with web technologies
- Debugging and testing
A packet in MQTT is a unit of data that is sent between clients and the MQTT broker.

The MQTT packet format consists of the following three parts:

- **Fixed header**: Made up of the packet type, packet flags, and length of the remaining packet.
- **Variable header**: Includes packet-type specific meta-data.
- **Payload**: The packet-type specific payload data, e.g., the message for a PUBLISH packet.

### 2.1 Fixed Header

Each MQTT Control Packet contains a Fixed Header as shown below.

<table>
<thead>
<tr>
<th>Bit</th>
<th>7</th>
<th>6</th>
<th>5</th>
<th>4</th>
<th>3</th>
<th>2</th>
<th>1</th>
<th>0</th>
</tr>
</thead>
<tbody>
<tr>
<td>byte 1</td>
<td>MQTT Control Packet type</td>
<td>Flags specific to each MQTT Control Packet type</td>
<td>Remaining Length</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>byte 2...</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The first 4-bits represent the control packet type of the MQTT packet. There are 15 different MQTT packet types. Some of the packet types with value and allowed direction are given in the following table.
The last four bits of the MQTT control packet, the so-called control flags, are fixed corresponding to the used packet type and cannot be changed by the client, with one exception, the PUBLISH control packet type.

- **DUP**: Indicates if this packet is a duplicate. Bit 3
  Value 0: New data packet
  Value 1 → Redelivery of the old packet.
- **QoS**: The Quality of Service level. Bit 2, 1
  Value 0: At most one delivery (it might deliver or not based on TCP status)

The remaining bits [3-0] of byte 1 in the Fixed Header contain flags specific to each MQTT Control Packet 404 type as shown below. Where a flag bit is marked as “Reserved”, it is reserved for future use and MUST 405 be set to the value listed. If invalid flags are received it is a Malformed Packet.
This QoS level ensures that a message is sent at most once without any confirmation. The publisher sends the message to the broker once and does not wait for any acknowledgment. Therefore, QoS 0 is suitable for applications where occasional data loss is acceptable, such as routine status updates that do not require confirmation.

DUP = Duplicate delivery of a PUBLISH packet 411

QoS = PUBLISH Quality of Service 412

RETAIN = PUBLISH retained message flag

### Remaining Length

**Position:** starts at byte 2.

The Remaining Length is a Variable Byte Integer that represents the number of bytes remaining within the current Control Packet, including data in the Variable Header and the Payload. The Remaining Length does not include the bytes used to encode the Remaining Length. The packet size is the total number of bytes in an MQTT Control Packet, this is equal to the length of the Fixed Header plus the Remaining Length.

### 2.2 Variable Header

The content and length of the variable header differ according to the packet type. For example, the following image shows the structure of the variable header for the CONNECT control packet.
Protocol name length: Indicates the length in bytes of the Protocol Name

Protocol name: ASCII representation of the protocol name, e.g., MQTT (0x4d 0x51 0x54 0x54)

Protocol level: “4” for MQTT v3.1.1, “5” for MQTT v5.0.

Connect flag: A 1-byte field with information about connection options like retention, QoS, clean session, etc. An example of this is attached just below.

<table>
<thead>
<tr>
<th>Bit</th>
<th>7</th>
<th>6</th>
<th>5</th>
<th>4</th>
<th>3</th>
<th>2</th>
<th>1</th>
<th>0</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>username flag</td>
<td>password flag</td>
<td>will retain</td>
<td>will QOS</td>
<td>will flag</td>
<td>*)</td>
<td>reserved</td>
<td></td>
</tr>
<tr>
<td>x</td>
<td>x</td>
<td>x</td>
<td>x</td>
<td>x</td>
<td>x</td>
<td>x</td>
<td>x</td>
<td>x</td>
</tr>
</tbody>
</table>
Username Flag:

1 → Username to send.

0 -> Username not necessary

Password Flag:

1 → Password to send.

0 -> Password not necessary

Will retain: if enabled, the message will be set as retained.

Will QOS: Indicates the QoS level with which the message will be sent.

Denotes the QoS level in 2 bits, i.e., QoS 0 = “0” and “0,” QoS 1 = “1” and “0,”
QoS 2 = “0” and “1.”

Will flag: if activated, the broker sends a Last Will message (LWT) on behalf of the client
when it disconnects unexpectedly.

Clean session: if active, the broker will clear any existing session when this client connects
and not store any session data after the client disconnects. Note that in MQTT
v5.0, this flag is called “clean start” and only affects the start of the session.

Keep Alive: Denotes the maximum time, in seconds, the client will leave before sending a packet to
the broker.

2.3 Payload

The payload holds the data related to the packet being sent. For a PUBLISH packet, this is the actual
message being sent. The message can be in any format, but most often in ASCII-encoded characters
formatted as JSON, XML, or text.

3. Packet Structures

This section contains some of the important packet structures. One can add his/her proprietary packets
as per wish.

The packet ASCII encoded in the JSON format, fields are separated by comma.

3.1 CONNECT Packet

Control Packet Type: 0x10 (16 in decimal)

The CONNECT packet is used by an MQTT client to establish a connection with an MQTT broker. It
includes information such as the protocol version, client identifier, clean session flag, keep-alive
interval, and authentication credentials (username and password).

3.2 CONNACK Packet

Control ACK Packet Type: 0x20 (32 in decimal)

The CONNACK packet is sent by the MQTT broker in response to a CONNECT packet. It acknowledges the client's connection request and provides status information, including a return code that indicates whether the connection was successful.
